Airland Combat An Organization For Joint Warfare:

Airland Combat Thomas A. Caldwell, 2002-04 Our unified or joint system of command is at the heart of our ability to plan and conduct the operations required to implement the national military strategy The joint system is disciplined by the principle that allows decisions to be made at the lowest possible level so that flexibility is given along with the necessary authority initiative and responsibility to those who can use it to the best advantage the joint commanders on the scene Our commanders exist to be ready to fight and fight successfully Should deterrence fail they are the ones who will carry out our war plans We must make sure that commanders get the forces they need and that the forces of the four services are integrated properly We must realize the full potential of those forces by ensuring that they can work together through sensible equipment effective joint doctrine and exercises Interoperability and effectively coordinated joint and combined operations will give us a payoff that is greater than the sum of the individual parts This book addresses one important aspect of our joint doctrine for unified operations within a theater joint warfare for airland combat Without clearly defined and well practiced joint tactics techniques procedures and an organization for airland combat the effective employment of all arms toward a single objective is made difficult even wasteful and dangerous The author is well qualified to write this book He served on the Air Staff during the important years in which the airland battle interface was developed and participated in the Air Staff contributions to the U S Army s Extended Battlefield and AirLand Battle Concepts While assigned to the Organization of the Joint Chiefs of Staff Colonel Cardwell participated in the development of NATO s and SHAPE s Conceptual Military Frameworks SHAPE s Follow On Forces Attack Concept the Joint Staff s Interdiction and Follow On Forces Attack Studies and the Joint Doctrine Development Program Colonel Cardwell has traced for us the development of airland combat strategy since World War I outlined current thinking on the subject and offered prescriptions for strengthening our capabilities for joint operations In so doing he has built a valuable source document on airland combat and contributed to the dialogue on joint doctrine in a meaningful and useful way John W Vessey Jr General USA Retired

Airland Combat: An Organization for Joint Warfare ,1992 Our unified or joint system of command is at the heart of our ability to plan and conduct the operations required to implement the national military strategy The joint system is disciplined by the principle that allows decisions to be made at the lowest possible level so that flexibility is given along with the necessary authority initiative and responsibility to those who can use it to the best advantage the joint commanders on the scene Our commanders exist to be ready to fight and fight successfully Should deterrence fail they are the ones who will carry out our war plans We must make sure that commanders get the forces they need and that the forces of the four services are integrated properly We must realize the full potential of those forces by ensuring that they can work together through sensible equipment effective joint doctrine and exercises Interoperability and effectively coordinated joint and combined operations will give us a payoff that is greater than the sum of the individual parts *Airland Combat* Thomas A.

Cardwell,1992 This book addresses one important aspect of our joint doctrine for unified operations within a theater joint warfare for airland combat Without clearly defined and well practiced joint tactics techniques procedures and an organization for airland combat the effective employment of all arms toward a single objective is made difficult even wasteful and dangerous The author has traced for us the development of airland combat strategy since World War I outlined current thinking on the subject and offered prescriptions for strengthening our capabilities for joint operations Foreword **Airland Combat** Gordon Press Publishers,1995-07 **Joint Operational Warfare** Milan N. Vego,2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security But in addition by sustaining animals on natural vegetation and as part of local ecosystems these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes This publication provides a glimpse into the often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with **Air-Land Combat** Thomas A. Cardwell, III,1994-01-01 The employment of forces on the modern battlefield to achieve military objectives takes the coordinated and joint contributions of land and air forces This volume discusses the history of joint U S forces in wars including the Gulf War Glossary of terms Illustrated Professional Journal of the United States Army ,1994 **Network Centric Warfare and Coalition Operations** Paul T. Mitchell,2009-02-05 This book argues that Network Centric Warfare NCW influences how developed militaries operate in the same fashion that an operating system influences the development of computer software It examines three inter related issues the overwhelming military power of the United States the growing influence of NCW on military thinking and the centrality of coalition operations in modern military endeavours Irrespective of terrorist threats and local insurgencies the present international structure is remarkably stable none of the major powers seeks to alter the system from its present liberal character as demonstrated by the lack of a military response to US military primacy This primacy privileges the American military doctrine and thus the importance of NCW which promises a future of rapid precise and highly efficient operations but also a future predicated on the digitization of the battle space Participation in future American led military endeavours will require coalition partners to be networked interoperability will therefore be a key consideration of a partner s strategic worth Network Centric Warfare and Coalition Operations will be of great interest to students of strategic studies international security US foreign policy and international relations in general *The Collaborative Fight* Paul R. Birch,Lina M. Svedin,2024-02-09 The beautiful picture of brothers in arms vanquishing a tyrant The power of a well orchestrated army and navy winning historic battles Overwhelming military might and ability through teamwork This is how the US military services portray themselves to the public and to their own service members through official doctrine

However under the veneer of jointness deeply fraught processes are at play Frequently the services think more about protecting organizational turf than about national security and maintaining an advantage against the United States external adversaries Uniting US military services is a difficult endeavor that becomes even more so the farther from a battlefield and the higher up the command structure the unifying needs to happen In *The Collaborative Fight* Paul R Birch and Lina M Svedin examine cases of institutional jointness among US military services from the late nineteenth century into the twenty first century They draw actionable conclusions for practitioners in the defense establishment while giving examples of successful joint cooperation that overcame the difficulties inherent in pursuing it Even the successful cases that Birch and Svedin discuss show that the US military services face bureaucratic incentives and organizational leadership issues that make battlefield cooperation less than ideal Birch and Svedin adeptly translate theory and history into approaches useful to practitioners in the field while examining the theoretical framework outlining the drivers in joint military cooperation

Global Air Power John Andreas Olsen, 2011 What influences have shaped air power since human flight became a reality more than a hundred years ago *Global Air Power* provides insight into the evolution of air power theory and practice by examining the experience of six of the world's largest air forces those of the United Kingdom the United States Israel Russia India and China and of representative smaller air forces in Pacific Asia Latin America and continental Europe The chapters written by highly regarded scholars and military leaders explore how various nations have integrated air power into their armed forces and how they have applied air power in both regular and irregular warfare and in peacetime operations They cover the organizational professional and doctrinal issues that air forces confronted in the past the lessons learned from victory and defeat and emerging challenges and opportunities Further *Global Air Power* supplements the traditional military perspective with examinations of the ideological economic and cultural factors that give air forces their distinctive characters Chapters show how the interplay among these internal factors together with external challenges determines the structure role and effectiveness of air forces Together these chapters illuminate universal trends as well as similarities and differences among the world's air forces Its combination of military history and sociopolitical analysis makes *Global Air Power* especially valuable to a broad range of historians air power specialists and general readers interested in national defense and international relations

A Military History of the Cold War, 1962-1991 Jonathan M. House, 2020-09-24 Study of the Cold War all too often shows us the war that wasn't fought The reality of course is that many hot conflicts did occur some with the great powers weapons and approval others without It is this reality and this period of quasi war and semiconflict that Jonathan M House plumbs in *A Military History of the Cold War 1962-1991* a complex case study in the Clausewitzian relationship between policy and military force during a time of global upheaval and political realignment This volume opens a new perspective on three fraught decades of Cold War history revealing how the realities of time distance resources and military culture often constrained and diverted the inclinations or policies of world leaders In addition to the Vietnam War

and nuclear confrontations between the USSR and the United States this period saw dozens of regional wars and insurgencies fought throughout Asia Africa and Latin America Cuba Pakistan Indonesia Israel Egypt and South Africa pursued their own goals in ways that drew the superpowers into regional disputes Even clashes ostensibly unrelated to the politics of East West confrontation such as the Nigerian Biafran conflict the Falklands Malvinas War and the Indonesian occupation of East Timor involved armed forces weapons and tactics developed for the larger conflict and thus come under House s scrutiny His study also takes up nontraditional or specialized aspects of the period including weapons of mass destruction civil military relations civil defense and control of domestic disorders The result is a single integrated survey and analysis of a complex period in geopolitical history which fills a significant gap in our knowledge of the organization logistics operations and tactics involved in conflict throughout the Cold War

Airpower Advantage Diane Therese Putney,2004 American air power is a dominant force in today s world Its ascendancy evolving in the half century since the end of World War II became evident during the first Gulf War Although a great deal has been written about military operations in Desert Shield and Desert Storm this deeply researched volume by Dr Diane Putney probes the little known story of how the Gulf War air campaign plan came to fruition Based on archival documentation and interviews with USAF planners this work takes the reader into the planning cells where the difficult work of building an air campaign plan was accomplished on an around the clock basis The tension among air planners is palpable as Dr Putney traces the incremental progress and friction along the way The author places the complexities of the planning process within the context of coalition objectives All the major players are here President George H W Bush General H Norman Schwarzkopf General Colin Powell General Chuck Horner and Secretary of Defense Richard Cheney The air planning process generated much debate and friction but resulted in great success a 43 day conflict with minimum casualties Dr Putney s rendering of this behind the scenes evolution of the planning process in its complexity and even suspense provides a fascinating window into how wars are planned and fought today and what might be the implications for the future C R Anderegg Director of Air Force History *Military Review* ,1994

U.S. Government Books ,1987 **Parameters** ,1994 **Air University Library Index to Military Periodicals** ,1994

Naval War College Review ,2008 *Naval War College Review* Naval War College (U.S.),1995 *Joint Force Quarterly* ,1993 *Joint Force Quarterly* is published for the Chairman Joint Chiefs of Staff by the Institute for National Strategic Studies National Defense University to promote understanding of the integrated employment of land sea air space and special operations forces The journal focuses on joint doctrine coalition warfare contingency planning combat operations conducted by the unified commands and joint force development

General Earle E. Partridge, USAF Airpower Leadership In A Limited War David H. Gurney,2014-08-15 This study analyzes the career of General Earle Everard Pat Partridge USAF with a focus on the airpower lessons that inspired his craftsmanship of the first air campaign of the United States Air Force The author separates Partridge s career into three sequential periods company grade operational experiences field grade

instructional and doctrinal studies and finally Partridge's flag grade leadership and innovation. The conclusion drawn from a career spanning both World Wars and culminating in the Korean War is that Partridge generally endorsed official doctrine as a training goal, a goal to be adjusted to meet the unique and unpredictable contextual demands of an explicit war scenario. Next, the writer evaluates Partridge's leadership in the Korean War, the first to follow the National Security Act of 1947, where service doctrine, joint training, and technology deficiencies demanded unprecedented compromise and innovation. The final section of the study illustrates the lessons learned by Partridge in the aftermath of the Korean War, lessons that are as valuable today as they were fifty years ago on the Peninsula where America and its allies fought Communist expansion.
