The Persons Case Robert J. Sharpe, Patricia I. McMahon, 2017-06-22 On 18 October 1929 John Sankey England's reform minded Lord Chancellor ruled in the Persons case that women were eligible for appointment to Canada's Senate Initiated by Edmonton judge Emily Murphy and four other activist women the Persons case challenged the exclusion of women from Canada's upper house and the idea that the meaning of the constitution could not change with time The Persons Case considers the case in its political and social context and examines the lives of the key players Emily Murphy Nellie McClung and the other members of the famous five the politicians who opposed the appointment of women the lawyers who argued the case and the judges who decided it Robert J Sharpe and Patricia I McMahon examine the Persons case as a pivotal moment in the struggle for women's rights and as one of the most important constitutional decisions in Canadian history Lord Sankey's decision overruled the Supreme Court of Canada's judgment that the courts could not depart from the original intent of the framers of Canada's constitution in 1867 Describing the constitution as a living tree the decision led to a reassessment of the nature of the constitution itself After the Persons case it could no longer be viewed as fixed and unalterable but had to be treated as a document that in the words of Sankey was in a continuous process of evolution The Persons Case is a comprehensive study of this important event examining the case itself the ruling of the Privy Council and the profound affect that it had on women's rights and the constitutional history of Canada

Restoration and Reclamation of Boreal Ecosystems Dale Vitt, Jagtar Bhatti, 2012-09-20 Boreal ecosystems contain one third of the world's forests and stored carbon but these regions are under increasing threat from both natural and anthropogenic disturbances Written by leaders from the forefront of private public and academic sectors Restoration and Reclamation of Boreal Ecosystems emphasises a broad conceptual approach to the specific application of empirical research into development planning restoration and modelling of these ecosystems The importance of this is highlighted at a time of global climate change as these ecosystems act as carbon sinks There is a focus on the reclamation of exploited ecosystems from a holistic standpoint ranging from environmental and edaphic variables to the restoration of keystone flora Recent advances in quantification of ecosystem services such as habitat suitability and carbon storage modelling are also detailed The book contains case studies which address how both historical

and novel assemblages can provide ecosystem stability under projected climatic and land use scenarios **Managing Forests and Water for People under a Changing Environment** Ge Sun, Kevin Bishop, Silvio Ferraz, Julia Jones, 2020-05-13 Forests cover 30% of the Earth's land area or nearly four billion hectares Enhancing the benefits and ecosystem services of forests has been increasingly recognized as an essential part of nature based solutions for solving many emerging global environmental problems today A core science supporting forest management is understanding the interactions of forests water and people These interactions have become increasingly complex under climate change and its associated impacts such as the increases in the intensity and frequency of drought and floods increasing population and deforestation and a rise in global demands for multiple ecosystem services including clean water supply and carbon sequestration Forest watershed managers have recognized that water management is an essential component of forest management Global environmental change is posing more challenges for managing forests and water toward sustainable development New science on forest and water is critically needed across the globe The International Forests and Water Conference 2018 Valdivia Chile <http://forestsandwater2018.cl> a joint effort of the 5th IUFRO International Conference on Forests and Water in a Changing Environment and the Second Latin American Conference on Forests and Water provided a unique forum to examine forest and water issues in Latin America under a global context This book represents a collection of some of the peer reviewed papers presented at the conference that were published in a Special Issue of *Forests* *The 325: Canada's Criminal Code (w/ Other Acts) - a Case Compilation*, A case compilation of the 325 most cited CC Extradition Act and Charter cases that I compiled to facilitate a one file download Assumes a person doesn't want to take the time to immerse themselves in case stream and nuances of the topic in CANLII.org where I obtained the cases and did the digesting of same myself to put it all together for you *Canadian Journal of Mathematics*, 1992-10 **Canadian Journal of Mathematics**, 1992-06 **Canadian Mathematical Bulletin**, 1992-09 *Wildland Fire, Forest Dynamics, and Their Interactions* Marc-André Parisien, Enric Batllori, Carol Miller, Sean A. Hanson, Charles R Stearns, 1988 **Euclidean Geometry** Mark Solomonovich, 2010 This textbook is a self contained presentation of Euclidean Geometry a subject that has been a core part

of school curriculum for centuries The discussion is rigorous axiom based written in a traditional manner true to the Euclidean spirit Transformations in the Euclidean plane are included as part of the axiomatics and as a tool for solving construction problems The textbook can be used for teaching a high school or an introductory level college course It can be especially recommended for schools with enriched mathematical programs and for homeschoolers looking for a rigorous traditional discussion of geometry The text is supplied with over 1200 questions and problems ranging from simple to challenging The solutions sections of the book contain about 200 answers and hints to solutions and over 100 detailed solutions involving proofs and constructions More solutions and some supplements for teachers are available in the Instructor's Manual which is issued as a separate book Book Reviews In terms of presentation this text is more rigorous than any existing high school textbook that I know of It is based on a system of axioms that describe incidence postulate a notion of congruence of line segments and assume the existence of enough rigid motions free mobility My gut reaction to the book is wouldn't it be wonderful if American high school students could be exposed to this serious mathematical treatment of elementary geometry instead of all the junk that is presented to them in existing textbooks This book makes no concession to the TV generation of students who want or is it the publishers who want it for them pretty pictures side bars puzzles games historical references cartoons and all those colored images that clutter the pages of a typical modern textbook while the mathematical content is diluted more and more with each successive edition Professor Robin Hartshorne University of California at Berkeley The textbook Euclidean Geometry by Mark Solomonovich fills a big gap in the plethora of mathematical textbooks it provides an exposition of classical geometry with emphasis on logic and rigorous proofs I would be delighted to see this textbook used in Canadian schools in the framework of an improved geometry curriculum Until this day comes I highly recommend Euclidean Geometry by Mark Solomonovich to be used in Mathematics Enrichment Programs across Canada and the USA Professor Yuly Billig Carlton University
