Alcoholism Its Scope Cause And Treatment:

Treatment and Rehabilitation of the Chronic Alcoholic Benjamin Kissin, 2012-12-06 The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social The multiplicity of proposed therapies each of which has its strong proponents suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy The latter may indeed be true but we cannot use what we do not know and must use what we do know We do however have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients If there is one conclusion we would like to offer in our preface it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom at least at our present level of knowledge a broad spectrum of treatment modalities is necessary If this is true then probably most of this book has validity With this volume on the treatment and rehabilitation of the chronic alcoholic we bring to completion our five volume series *The Biology of Alcoholism* As the title of the present volume indicates we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work Social, Psychological, and Economic Aspects of Alcoholism Catherine S. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Alcoholism and Narcotics,1976 *The Social Importance of Self-Esteem* Andrew Mecca,Neil J. Smelser,John Vasconcellos,1989-08-15 Is the well being of a society dependent on the well being of its citizenry Does individual self esteem play a causal role in chronic social problems such as child abuse school drop out rates teenage pregnancy alcohol and drug abuse welfare dependency In an attempt to answer these questions the State of California established a task force on self esteem and social responsibility in 1987 The aim of this body was to determine what connections might exist between these two factors and to suggest policy guidelines relating to the welfare of Californians and to the expenditure of public resources The ten essays in this volume prepared by faculty members of the University of California draw on research in the social and behavioral sciences to explore these issues They assess the substantive assertions and research findings in the field and make careful evaluations of their reliability and validity In many cases strong connections between self esteem and problematic behavior are established in others the connections are weak and in some the causal relationship is as yet imperfectly understood One of the conclusions of the book is that research on these issues needs to be improved particularly in the areas of comparative and longitudinal studies Guidelines for future research are suggested and some points of policy direction are elaborated These essays may indeed promote additional research for the premise that social stability and welfare are largely dependent on the psychological state of a people poses a challenging and provocative counter emphasis to the assumption that social institutions are the primary determinants of individual welfare
