Aldabra Alone Tony Beamish, 1970      **G. Evelyn Hutchinson and the Invention of Modern Ecology** Nancy G. Slack, 2010-01-01 Slack enjoyed full access to Hutchinson's archives and conducted extensive interviews both with Hutchinson himself and with his students, colleagues and friends. She evaluates his contributions to theoretical ecology, limnology, the study of fresh water ecosystems, biogeochemistry, population ecology and the creation of the new fields of systems ecology and radiation ecology and she discusses his profound influence as a mentor. The book also looks into his personal life which included three very different wives, a refugee baby under his care during World War II, friendships with such contemporaries as Rebecca West, Margaret Mead and Gregory Bateson and a host of colleagues and friends on four continents. Filled with information available nowhere else, this book draws a vibrant portrait of a giant in the discipline of twentieth century ecology who was also a man of remarkable personal appeal. Book Jacket      *Coral Reefs of the Indian Ocean* T. R. McClanahan, C. R. C. Sheppard, D. O. Obura, 2000-10-12 Coral reefs are among Earth's most diverse, productive and beautiful ecosystems but until recently their ecology and the means to manage them have been poorly understood and documented. In response to the inadequate information base for coral reefs, this book reviews the ecological and conservation status of coral reefs of the Western Indian Ocean, bringing together presentations of the region's leading scientists and managers working on coral reefs. *Coral Reefs of the Indian Ocean: Their Ecology and Conservation* starts with a general overview of the biogeography of the region and a historical account of attempts to conserve this ecosystem. It goes on to describe the state of the reefs in each of the countries with coral reefs and it concludes with a series of management case studies. The book also summarizes most of the existing ecological information on reefs in this region and efforts at management, making it useful for students, teachers and investigators interested in tropical or marine ecology, conservation, biology and management and environmental sciences.      *Bulletin of Miscellaneous Information*, 1893 Appendix 3 1890 contains Index to Kew reports covering 1862-82      Seychelles Lyn Mair, Lynna Beckley, Lynna E. Beckley, 2012 Palm fringed silvery sands, turquoise seas, misty mountain peaks and coral reefs coupled with tropical sun and starry skies make the Seychelles an idyllic escape for discerning travellers. With plants and animals historically linked to Africa, Madagascar and Asia and marine life native to the tropical Indo-Pacific region, the Seychelles is a haven for those interested in natural history and this is the only travel guide to the Seychelles with a comprehensive account of the flora and fauna. The authors provide fascinating coverage of the islands' biodiversity from mangroves, turtles and birds to nature reserves. Updated throughout, they reveal the islands' many secrets from coco de mer palm forests and bird sanctuaries to local markets and Creole cuisine.
