Agricultural transformation: trends in farm size, crop diversification and mechanization in Nicaragua and Peru Srinivasan, S.V., Saborío, M., Morales Opazo, C., 2022-09-02 Structural change is a process in which the amount of labour capital and land dedicated to agriculture and other sectors changes over time In this study we focus on the cases of Peru and Nicaragua using their two most recently administered agricultural censuses The agricultural censuses permit us to identify dimensions and information available to study the process of structural change in Latin America over the last 20 years The study includes a comparative analysis and policy recommendations based on the two most recent agricultural censuses administered in Nicaragua 2001 and 2011 and Peru 1994 and 2012 Processing and analysing information from these censuses contribute to identifying dimensions and information available to study the process of structural change in Latin America over the last 20 years Evidence based policymaking is increasingly more at the core of the United Nations and member countries activity In the case of FAO this type of study is crucial to build the knowledge body on which projects and activities are carried forward The Hand in Hand HiH initiative is a key example in this context as it aims at quantitatively identifying high impact and high agricultural potential areas in which to invest within developing countries As Nicaragua and Peru are HiH s target countries this study will show very useful to learn about their recent experiences in agricultural transformations

*Sustainable Poverty Reduction in Less-favoured Areas* Ruerd Ruben, J. Pender, Arie Kuyvenhoven, 2007-01-01 Less favored areas with limited agricultural potential or difficult access conditions support 40 percent of the world s rural population suffering from chronic poverty While agricultural innovations and rural development programs have begun to be implemented within developing countries they do not address the specific obstacles faced by this large population Instead a targeted approach is needed to identify different resource management strategies for particular types of households and communities as well as creating balanced investments aimed at sustainable intensification of rural livelihoods Such efforts have been the focus of the research program on Regional Food Security Policies for Natural Resource Management and Sustainable Economies RESPONSE Through the study of less favored areas in Africa Latin America and South and East Asia development pathways allowing for the careful adjustment of resource use strategies at the field farm household and village level are explored

*Survival Strategies of Poor Women in Urban Africa* C. O'Reilly, A. Gordon, 1995 Urban poverty is increasing alongside growing urban populations in sub Saharan Africa Women constitute a significant proportion of the urban poor but their role is often neglected by development projects This publication highlights the range

of strategies that women have devised for themselves in order to cope with difficult economic circumstances in present day Zambia Natural resources figure prominently in urban women s activities not only as a source of food and fuel but as a source of income through trading activities Ways in which women s livelihoods can be improved are also discussed
