presenting the themes one notes that the strong points and weaknesses of Hannah's spirituality are related to other Christian spiritual traditions. In order to conduct a comprehensive study the introductory section of this study deals with the significance of allegory and spirituality.

Being Human in an Artificial World Geoffrey W. Cheong, 2024-06-01

The vision of Raimon Panikkar is to examine an understanding of the fulness of the human experience understood ultimately in the iconic image of Jesus the Christ. This book aims to explore an understanding of his work in context of the history of humanity, the emerging integral era of perception, the context of the contemporary secular society which he speaks of as an artificial life and the context of creation and the creator. As creature he sees the secret of life in the inter-relational nature of the three: creature, creation and creator. The unique nature of this mysterious three-way unity leads him to coin a term to speak of its nature as Cosmotheandric. His extensive academic background of philosophy, theology and science and the broad life of spirituality lived in the context of the interreligious world of both East and West equips well his mind to probe life's nature. Of his many students, Ewert Cousins asks the pertinent question of how to live Panikkar's vision. It is the author's contribution to respond to Cousins' question while drawing upon Panikkar's cosmotheandric concept by drawing upon contemporary knowledge through the model of the scriptural wisdom to love God and one's neighbour as one's self. This he refers to as Relational Spirituality. The integral era of history is appearing on the horizon of the global psyche to birth a new era of human mindfulness like never before. Carl Jung has highlighted two major times of transition shaping humankind through the passing millennia that have moved humanity from a simple human life to the highly complex time of today. Jung spoke of the transition in human consciousness through the millennium prior to the life of Jesus Christ as the First Axial Period of History. Martin Heidegger, Teilhard de Chardin, Jean Gebser, Ken Wilber, Ewert Cousins, Raimon Panikkar are some of the thought leaders of our time who have made major contributions to this understanding of the emerging Integral awareness. For many the disturbing changes encountered on the surface of society ring loudly of crisis. Secularisation is the dominant life style primarily shaped by the cyber revolution and its Artificial Intelligence. Most concerning is the range of questions humans face about their personal value and loss of substantial meaning. Dr Cheong draws upon the great minds listed above, in particular the work of Raimon Panikkar, to map a pathway for growing more fully into an Integral way of life which he refers to as Relational Spirituality.

Seeking Consciousness: A Human Journey of Understanding Pasquale De Marco, 2025-03-09

Journey into the depths of human consciousness and explore the profound questions that have puzzled philosophers and scientists for centuries. In this thought-provoking book we delve into the enigma of consciousness: the nature of the self, the illusion of free will and the search for meaning and purpose in life. We begin our exploration by examining the nature of consciousness itself. What is it that makes us conscious beings? What are the different states of consciousness and how do they shape our experience of reality? We will encounter the hard problem of consciousness, one of the most vexing questions in science. How does the physical brain give rise to conscious experience? Next we turn our

attention to the mind body problem Is the mind a product of the brain or is it something more mysterious We will explore the different theories of mind body interaction from dualism to materialism and consider the implications of each for our understanding of the human condition We will also investigate the nature of the self and personal identity What makes us who we are Is our sense of self fixed and immutable or is it fluid and constantly changing We will examine the relationship between the self and the brain the self and memory and the self and narrative identity Our journey will then take us to the frontiers of artificial intelligence and the future of consciousness As AI technology continues to advance we must grapple with the ethical and philosophical questions it raises What does it mean to be human in a world where machines are becoming increasingly intelligent Will AI eventually achieve consciousness and if so what rights and responsibilities will it have Finally we will conclude our exploration by pondering the meaning and purpose of life What is the point of our existence Is there a grand plan or design or are we simply accidental beings adrift in a vast and indifferent universe We will consider the existential crisis that arises from this uncertainty and explore the various ways in which people have sought to find meaning and purpose in their lives Throughout this book we will draw on insights from a wide range of disciplines including philosophy psychology neuroscience and literature We will also share personal stories and anecdotes to illustrate the abstract concepts we are discussing Our goal is to provide readers with a comprehensive and thought provoking exploration of the human condition leaving them with a deeper understanding of themselves and the world around them If you like this book write a review
