The Computer in Reading and Language Arts Jay S. Blanchard, George E. Mason, 1987 In this stimulating and readable book educators most of whom have long been involved in computer based literacy research efforts provide up to date information on computer based activities in reading and language arts These experts offer valuable goals and strategies for integrating computer technology into the reading language arts curriculum including suggestions for activities that should and should not be used They also address the basics of developing evaluating and using computer based reading instruction programs The unique benefits of computer technology to teach English as a second language writing skills and the reading process to early readers are thoroughly explored Innovative Uses of the Computer in the Language Arts Classroom Computerized readability assessment Reinforcement and instructional objectives Student interest profiles Class book files This exciting book in a broader sense corrects the failure by many to consider the literacy issues that invariably surround and govern computer use While the types of computer literacy environments differ the literacy requirements are still the same the computer and the user must communicate through text Thus The Computer in Reading and Language Arts provides essential understanding of the literacy requirements and environments involved in computer use
