George Inness and the Science of Landscape Rachael Z. DeLue, 2008-09-15 George Inness 1825-94 long considered one of America's greatest landscape painters has yet to receive his full due from scholars and critics A complicated artist and thinker Inness painted stunningly beautiful evocative views of the American countryside Less interested in representing the details of a particular place than in rendering the subjective mystery of nature Inness believed that capturing the spirit or essence of a natural scene could point to a reality beyond the physical or as Inness put it the reality of the unseen Throughout his career Inness struggled to make visible what was invisible to the human eye by combining a deep interest in nineteenth century scientific inquiry including optics psychology physiology and mathematics with an idiosyncratic brand of mysticism Rachael Ziady DeLue's *George Inness and the Science of Landscape* the first in depth examination of Inness's career to appear in several decades demonstrates how the artistic spiritual and scientific aspects of Inness's art found expression in his masterful landscapes In fact Inness's practice was not merely shaped by his preoccupation with the nature and limits of human perception he conceived of his labor as a science in its own right This lavishly illustrated work reveals Inness as profoundly invested in the science and philosophy of his time and illuminates the complex manner in which the fields of art and science intersected in nineteenth century America Long awaited this reevaluation of one of the major figures of nineteenth century American art will prove to be a seminal text in the fields of art history and American studies **Contemporary Theory of Conservation**

Salvador Munoz-Vinas, 2012-05-23 Classical theories of conservation are well known in the heritage community but in the last two decades thinking has shifted and classical theory has faced increasing criticism *Contemporary Theory of Conservation* brings together current ideas in conservation theory presenting a structured coherent analysis of the subject for the first time This engaging and readable text is split into 3 parts The first *Fundamentals of conservation* addresses the identity of conservation itself and problems arising when classical conservation theories are applied The second part *Questioning*

classical theories delves deeper into the criticism of classical ideas such as reversibility This leads on to the creation of new paradigms such as sustainability which are covered in the final part of the book Conservation ethics
