Tomlin,Christine M. Nowik,2024-03-01 COVID 19 and increased attention to how institutions of higher education IHEs serve an increasingly diverse student population have brought conversations about standard practices from the margins to the center as faculty explore how to improve learning and student success for all students Historically IHEs were built by a privileged class for a privileged class a system and structure built on specific epistemologies practices and habits of mind and language that replicate privilege and leave many students underserved in their academic pursuits One way faculty have increased equity in their college classrooms is through the use of alternative assessment alt assessment practices This volume aims to share the experiences of faculty who have leveraged non traditional grading paradigms for the sake of increasing student learning a sense of belonging and equity in their classrooms Meant to orient faculty who are considering how to implement alt assessment in their own classes as well as those who are already employing various grading frameworks this volume will celebrate new and innovative approaches share lessons learned and invite a broader

coalition of faculty into the stream of conversation about pedagogical innovation Faculty educators and practitioners share their approaches to alternate assessment in this volume as well as the critiques lessons and outcomes associated with their pedagogical decisions Written by practitioners for practitioners we hope the book will provide theoretical and practical guidance for alternative assessment practices such as ungrading contract grading standards based grading and labor based grading across various disciplines and within different academic contexts

The First Sourcebook on Asian Research in Mathematics Education - 2 Volumes Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K. Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information

technology and the flat earth syndrome old distinctions and biases between different groups of researcher s persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives

Resources in Education ,1998 **Assessment hotspots** , Learning About Assessment, Learning Through Assessment National Research Council,Mathematical Sciences Education Board,Deborah Bryant,Mark Driscoll,1998-08-14 The MSEB with generous support and encouragement from the Carnegie Corporation of New York seeks to bring discussion of assessment to school and district based practitioners through an initiative called Assessment in Practice AIP Originally conceived as a series of next steps to follow the publication of Measuring Up and For Good Measure the project with assistance from an advisory board developed a publication agenda to provide support to teachers and others directly involved with the teaching and assessment of children in mathematics classrooms at the elementary middle and high school levels In a series of three booklets AIP presents an exploration of issues in assessment The first booklet Learning About Assessment Learning Through Assessment discusses ways to assist teachers in learning about assessment and how student work can be a rich resource in professional development The second Assessment in Support of Instruction makes a case for aligning assessments with state and district curriculum frameworks and examines ways in which states have shifted their curriculum frameworks and related state assessment programs to reflect the NCTM Standards and other perspectives The third booklet Keeping Score discusses issues to be considered while developing high quality mathematics assessments This series is specifically designed to be used at the school and school district level by teachers principals supervisors and measurement specialists
