**The Dynamics of Aggression** Michael Potegal, John F. Knutson, 2013-06-17 Aggression usually

involves a sequence of behaviors reflecting escalations and de escalations in the form or intensity of the actions taken which play out over time This book provides a context in which social and biological research on the aggressive behaviors of human and non human subjects interacting in dyads or groups can be compared and integrated Implicit in this juxtaposition is the major question of whether general principles governing the dynamics of aggression within and between episodes may be discerned Aggressive behavior is described at different levels of analysis in humans and a number of other animal species Three basic views of aggression dynamics become apparent The economic interpretation Aggression will be escalated when it pays one of the combatants to do so or more generally when the potential benefits outweigh the risks Decisions to escalate or de escalate are part of a calculated strategy in one or another sense This interpretation is formalized within game theoretic models as applied to animal conflicts and to international conflicts within the chapters of this text The psychological process interpretation Emphasis is placed on psychological physiological processes within the individual The chapters stress the importance of acute emotional states of anger and aggressive arousal and argue the role of peripheral sympathetic activation while proposing a central neural mechanism Children escalating their tantrums adult humans and animals of other species intensifying their interpersonal conflicts national leaders going to a war footing all appear to suffer a narrowing of attention and progressive failure of cognitive function under the intensifying stress of conflict Perhaps these changes in attention sensory and cognitive functions and risk taking reflect a commitment to aggression which is necessary for organisms to engage in potentially dangerous and painful encounters The emergent process interpretation Escalation emerges in a spontaneous and dynamic way as the actions of one participant elicit reactions from the other s

**Handbook of Social Development** Vincent B. Van Hasselt, Michel Hersen, 2013-11-11 Social development over one s lifetime is a complex area that has received considerable attention in the psychological social psychological and sociological literature over the years Surprisingly however since 1969 when Rand McNally published Goslin s Handbook of Socialization no comprehensive statement of the field has appeared in book form Given the impressive data in this area that have been adduced over the last two decades we trust that our handbook will serve to fill that gap In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood adolescence adulthood and finally one s senior years In so doing we cover a variety of issues in depth The book contains 21 chapters and is divided into five parts I Theoretical Perspectives II Infants and Toddlers III Children and Adolescents IV Adults and V The Elderly Each of the parts begins with introductory material that reviews the overall issues to be considered Many individuals have contributed to the final production of this handbook Foremost are our eminent contributors who graciously agreed to share with us their expertise We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project Finally we thank Eliot Werner Executive Editor at Plenum for his willingness to publish and for his tolerance for the delays inevitable in the development of

a large handbook      *The Cambridge Handbook of Prosociality* Tina Malti, Maayan Davidov, 2023-06-08 Prosociality is a multifaceted concept referring to the many ways in which individuals care about and benefit others Human prosociality is foundational to social harmony happiness and peace it is therefore essential to understand its underpinnings development and cultivation This handbook provides a state of the art in depth account of scientific theoretical and practical knowledge regarding prosociality and its development Its thirty chapters written by international researchers in the field elucidate key issues including the development of prosociality across infancy childhood adolescence and beyond the biological cognitive emotional and motivational mechanisms that underlie and influence prosociality how different socialization agents and social contexts can affect children s prosociality and intervention approaches aimed at cultivating prosociality in children and adolescents This knowledge can benefit researchers students practitioners and policy makers seeking to nurture socially responsible caring youth

**A Writing Halfway Between Theory and Fiction** Miriam Wallraven, 2007 This book is focused on the surprisingly large number of feminist women writers in literary history who use different genres for their feminist ideas while subverting or transgressing established boundaries between fictional and theoretical writing In particular texts by such diverse authors as Mary Wollstonecraft Mary Hays Mary Robinson Harriet Martineau Olive Schreiner Virginia Woolf the French Feminists H l ne Cixous and Monique Wittig Margaret Cavendish and Mich le Roberts are analysed This chronological in depth reading of feminist texts is based on the interrelation of content genre and discourse The study provides the first analysis of the phenomenon of the gendering of genre and feminists troubled involvement in theory as well as literature In this way key questions concerning the emergence of feminism during the last four hundred years are presented in a new and revealing light e g for what reason did Mary Wollstonecraft not only write her famous feminist treatise *A Vindication of the Rights of Woman* but also a novel in which she tests the arguments of her theoretical treatise by means of fiction What is the significance of Virginia Woolf s *Novel Essay The Pargiters* which seeks to connect theoretical and fictional parts by juxtaposing them How can the mixture of genres be interpreted which Catherine Cl ment attributes to the texts of H l ne Cixous as a writing halfway between theory and fiction Back cover

**The Evolution of Altruism and the Ordering of Love** Stephen J. Pope, 1995-04-01 In this book Stephen J Pope argues that contemporary scientifically based theories of the evolution of altruism provide important insights into one of the fundamental moral problems of Christian ethics the natural basis of love and its ordering He explores the contributions evolutionary

theory makes to our understanding of the biological foundations of kin preference and reciprocal care the limits of love and the need for an ordering of love issues relevant to any ethic that accords a central role to the deeply natural affections found in friendship marriage and the family He proposes that understanding human nature in its broader evolutionary context brings to ethics a needed balance between the personal and biological dimensions of human nature In the context of Catholic ethics Pope points out functional similarities between Thomas Aquinas's use of then available scientific theories in his interpretation of the natural basis of primary relationships and Pope's own efforts to avoid the deficiencies that characterize contemporary Catholic interpretations of love based on personalism and existentialism He concludes with a call for a multidimensional interpretation of love one that incorporates scientifically based theories about human nature together with an appreciation of the significance of motives intentions and freedom for the ordering of human affections and moral responsibility This book will be of interest to moral theologians especially those concerned with the topics of love justice and natural law ethics

Psychology and Social Responsibility Sylvia Staub, Paula Green, 1992-06 This book brings together for the first time many of the leading writers and thinkers from the psychological and mental health fields Contributors include Robert Jay Lifton Joanna Macy Roger Walsh and others

**Understanding Genocide** Leonard S. Newman, Ralph Erber, 2002-09-26 When and why do groups target each other for extermination How do seemingly normal people become participants in genocide Why do some individuals come to the rescue of members of targeted groups while others just passively observe their victimization And how do perpetrators and bystanders later come to terms with the choices that they made These questions have long vexed scholars and laypeople alike and they have not decreased in urgency as we enter the twenty first century In this book the first collection of essays representing social psychological perspectives on genocide and the Holocaust prominent social psychologists use the principles derived from contemporary research in their field to try to shed light on the behavior of the perpetrators of genocide The primary focus of this volume is on the Holocaust but the conclusions reached have relevance for attempts to understand any episode of mass killing Among the topics covered are how crises and difficult life conditions might set the stage for violent intergroup conflict why some groups are more likely than others to be selected as scapegoats how certain cultural values and beliefs could facilitate the initiation of genocide the roles of conformity and obedience to authority in shaping behavior how engaging in violent behavior makes it easier for one to aggress again the evidence for a genocide prone personality and how perpetrators deceive themselves about what they have done The book does not culminate in a grand theory of intergroup violence instead it seeks to provide the reader with new ways of making sense of the horrors of genocide In other words the goal of all of the contributors is to provide us with at least some of the knowledge that we will need to anticipate and prevent future such tragic episodes
