Alzheimer's Turning Point Jack C. de la Torre, 2016-06-25 This compelling text provides an overview of the available technology for early detection and therapeutic management of vascular risk factors to Alzheimer s before severe cognitive impairment symptoms appear

Chapters bring the reader from the trackless clinical research that has characterized Alzheimer's progress for the last 20 years to a nexus of new ideas and concepts that can change our outlook of this dementia. In depth examinations of various hypotheses, preventive measures, current and prospective treatments are openly and clearly explored. The author discusses in depth his proposal of the vascular hypothesis of Alzheimer's disease which has become a mother lode for basic and clinical studies and a key approach to the prevention of this dementia. Alzheimer's Turning Point offers professionals, students and those looking to learn more about this disorder a fresh clinical perspective of this devastating disease.

The Contingent Valuation Method in Health Care Sandra Nocera, Harry Telser, Dario Bonato, 2003-11-30. The Contingent Valuation Method in Health Care is offered as a contribution to improving instruments of political decision making in health care. At a fundamental level it is about methodological aspects of the contingent valuation method. It gives a holistic view of applying the contingent valuation method for use in policy. It shows all stages of a contingent valuation study beginning with the design, the choice of elicitation techniques and estimation methods for willingness to pay, the use of the results in a cost-benefit analysis and finally the policy implications resulting from our findings. The intended audience of The Contingent Valuation Method in Health Care are health economists interested in methodological problems of contingent valuation studies, people involved in health care decision making, planning and priority setting as well as people interested in Alzheimer's Disease.

Until There's a Cure United States. Congress. Senate. Special Committee on Aging, 2011. **Cells Are the New Cure** Robin L. Smith, Max Gomez, 2023-12-19. The future of medicine is happening now. Revolutionary new science is providing cures that were considered science fiction just a few years ago and not with pills, surgery or radiation but with human cells. Promising treatments now in extensive clinical trials could have dramatic impacts on cancer, autoimmune diseases, organ replacement, heart disease and even aging itself. The key to these breakthroughs is the use of living cells as medicine instead of traditional drugs. Discover the advances that are alleviating the effects of strokes, Alzheimer's disease and even allergies. Cells Are the New Cure takes you into the world of regenerative medicine which enables doctors to repair injured and aging tissues and even create artificial body parts and organs in the lab. Cellular medicine experts Robin L. Smith MD and Max Gomez PhD outline the new technologies that make it possible to harness the immune system to fight cancer and reverse autoimmune diseases like multiple sclerosis, type 1 diabetes and rheumatoid arthritis. CRISPR, a new technology for targeted gene editing, promises to eradicate genetic diseases, allowing us to live longer lives, possibly even beyond age 100 in good health. Cells Are the New Cure takes you on a tour of the most exciting and cutting-edge developments in medicine. The content inside these pages could save your life or the life of someone you love.
