Information Circular United States. Bureau of Mines, 1941 *Information Circular* , 1941 **Journal of Petroleum Technology** , 1992 Fuelling Empire Karl Ittmann, 2025-05-26 Beginning in the late nineteenth century British companies used the resources of empire to create an imperial oil industry that controlled 20% of global oil reserves by 1939 and allowed for the movement of capital and labor between regions and companies The imperial oil complex encompassed colonies Burma and Trinidad and dependent states Iraq and Iraq In both the imperial state used its political and military power to support British oil interests The oil complex drew on the resources of empire but also bolstered it with profits and tax revenues while a global set of oil sites supplied the British military and civilian consumers British companies built an infrastructure of oil production that gave them quasi state power in oil regions while connecting these areas to global and imperial networks of communication and transportation Fueling Empire highlights the significance of Britain to the development of the global oil industry It demonstrates the ways in which the global histories of oil and empire are inextricably interlinked The imperial oil complex relied on a racially stratified hierarchy of labour where white supervisors managed indigenous and migrant workers The harsh conditions of work and low pay fuelled labour conflicts that resonated with emerging colonial nationalist

movements that sought to limit the power of oil companies Despite robust private and state security operations the imperial oil complex faced greater insecurity before World War II While the imperial oil complex survived the war in the postwar era decolonization and Britain's financial weakness led to its decline The Oil of Brazil Drielli Peyerl,2019-05-22 This book investigates the role of the National Petroleum Council CNP and especially of Petrobras in the construction and shaping of courses in Geosciences as part of the historical process of the search for and exploration of oil which began in Brazil in 1864 and ended in 1968 with the discovery of the first offshore well The book explores the history of the discovery of oil in Brazil together with the historical development of oil research and geosciences in Brazil It also elucidates significant events and developments which occurred between 1864 and 1968 such as the foundation of the Ouro Preto Mining School the foundation of the CNP and Petrobras and other scientific societies and universities and their contributions to the formation and constitution of geosciences in Brazil This book also discusses the massive investments by CNP and Petrobras in technical and scientific research for oil exploration in the Brazilian territory This unique book appeals to scientists students and professionals in geosciences history and related fields Seventy Five Years of Progress in Oil Field Science and Technology M. Ala,H. Hatamian,G.D. Hobson,M.S. King,I. Engineering: Volume 1 William C. Lyons,1996-10-16 Petroleum engineering now has its own true classic handbook that reflects the profession's status as a mature major engineering discipline Formerly titled the Practical Petroleum Engineer's Handbook by Joseph Zaba and W T Doherty editors this new completely updated two volume set is expanded and revised to give petroleum engineers a comprehensive source of industry standards and engineering practices It is packed with the key practical information and data that petroleum engineers rely upon daily The result of a fifteen year effort this handbook covers the gamut of oil and gas engineering topics to provide a reliable source of engineering and reference information for analyzing and solving problems It also reflects the growing role of natural gas in industrial development by integrating natural gas topics throughout both volumes More than a dozen leading industry experts academia and industry contributed to this two volume set to provide the best most comprehensive source of petroleum engineering information available

Social Justice in Action Neal A. Lester,2024-11-08 Addressing both veterans of justice work and novices seeking points of entry the essays in this volume showcase practical approaches to diversity equity and inclusion ways to build community earn trust tell unheard stories and develop solutions to problems Emphasizing values such as empathy self reflection and integrity the volume is rooted in humanities work but also features contributions from fields as diverse as the performing arts

architecture and evolutionary biology and represents settings beyond the college campus such as schools libraries museums and prisons While bringing insights from higher education it critiques the system as well exploring the ways that institutions reinforce power structures and exclude marginalized voices Interspersed with the essays brief reflections by activists and artists offer testimony and inspiration

Nationalising Oil and Knowledge in Iran Mattin Biglari, 2025-02-28 Iran's nationalisation of oil in 1951 was a key catalyst for the rise of resource nationalism as an animating force of global decolonisation expelling the Anglo Iranian Oil Company AIOC now known as BP after nearly fifty years of domination in southwest Iran Nationalising Oil Knowledge in Iran turns attention to the origins of nationalisation in the everyday struggles between the oil company and subaltern actors in the city of Abadan then home to the world's largest oil refinery and deeply imbricated in networks of colonialism and racial capitalism Engaging with energy history postcolonial subaltern studies and science technology studies the book focuses on the politics of expertise how nationalisation reproduced the epistemic coloniality of the oil company which rested on local dispossession social engineering as well as racial and gendered segregation It argues that nationalisation diverged from subaltern contestations of oil expertise in Abadan which presented a more fundamental challenge to colonial modernity
