A Guide To Bone Marrow Transplantation:

A Guide to Bone Marrow Transplantation Hans-Joachim Deeg, Hans-Georg Klingemann, Gordon L. Phillips, 2012-12-06 In the late 1940s investigators observed that mice given supralethal doses of total body irradiation were protected by infusion of viable spleen or marrow cells following irradiation and that this was accomplished by hemopoietic reconstitution with donor cells as proven using genetic markers If a similar approach could be applied to humans it should be possible to treat leukemia patients with any dose of chemoradiotherapy as far as nonmarrow toxicity permitted and then rescue them by marrow transplantation Early clinical attempts were generally unsuccessful mostly due to a lack of knowledge of histocompatibility antigens and appropriate supportive care These areas developed rather quickly during the 1960s and for almost two decades now clinical marrow transplantation has been carried out with increasing success After initially using only bone marrow from HLA identical siblings the field has expanded rapidly to incorporate HLA nonidentical related donors and recently even marrow from unrelated volunteer donors Furthermore since for numerous patients who otherwise could benefit from transplantation a donor cannot be identified there has been a growing interest in using the patient's own autologous bone marrow Our understanding of the principles of transplantation and our knowledge of the potential risks and benefits have quickly grown At times it is difficult however to decide what is the best option for a given patient [A Guide to Bone Marrow Transplantation](#)

Joachim Deeg,Hans-Georg Klingemann,Gordon L. Phillips,Gary Van Zant,2011-06-28 The first edition to *A Guide to Bone Marrow Transplantation* was published 10 years ago At that time we perceived a need for an introductory text to the area of marrow transplantation a rapidly developing field with few general texts available Since then the situation has changed dramatically Several introductory texts therapeutic manuals and comprehensive volumes have been published There is a heightened awareness of the availability utility and potential of bone marrow transplantation and of peripheral blood stem cell transplantation in particular In many cases stem cell transplantation is being practiced by physicians as a standard therapy For those reasons we weighed carefully the question whether the Guide was still useful or even had a place The feedback we received from physicians in practice or in training including both hematologists and other physicians as well as from nurses physician s assistants nurse practitioners and other personnel involved in one way or another in hematopoietic stem cell transplantation indicated that such a text was still desirable as an introduction that focused on principles rather than the latest up to date results *Bone Marrow Transplants* Marianne L. New Approaches to the Treatment of Leukemia Emil J. Freireich,2012-12-06 The European School of Oncology came into existence to respond to a need for information education and training in the field of the diagnosis and treatment of cancer There are two main reasons why such an initiative was considered necessary Firstly the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated Secondly the rate of technological development that impinges on the diagnosis and treatment of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly With its residential courses for organ pathologies and the seminars on new techniques laser monoclonal antibodies imaging techniques etc or on the principal therapeutic controversies conservative or mutilating surgery primary or adjuvant chemotherapy radiotherapy alone or integrated it is the ambition of the European School of Oncology to fill a cultural and scientific gap and thereby create a bridge between the University and Industry and between these two and daily medical practice **The Absolute**
