A Guide To Computer Applications In The Humanities By Hockey Susan:

A Guide to Computer Applications in the Humanities Susan M. Hockey, 1980 The Routledge Introduction to English Canadian Literature and Digital Humanities Paul Barrett, Sarah Roger, 2025-06-30 The Routledge Introduction to English Canadian Literature and Digital Humanities is a guide to the concepts and theories at the intersection of Canadian literary studies and digital humanities DH Equal parts theoretical and practical it focuses on debates that overlap the two domains This book historicizes the connections between the two by surveying the history of DH in Canada the tradition of Canadian writers engaging with technology and DH analyses of Canadian literature It also situates both CanLit and DH with respect to contemporary concerns about alterity and it demonstrates how digital technologies allow writers and scholars to intervene in them This book complements its theoretical discussions with a practical introduction to DH methods Using Canadian literary texts and examples from projects at the intersection of CanLit and DH it introduces key DH approaches to novice readers Topics covered include data collection data management and textual analysis as well as essential DH tools and the Python programming language A concluding case study guides readers interested in applying the ideas presented throughout

text's manuscript tradition, literary tradition, and date. There follows the most extensive section: a comparative analysis of the disputed sermons and Cyril's Baptismal Catecheses in the areas of liturgical rites, theology, spirituality, and literary style. The text is then compared to the known works of the contending author, John II of Jerusalem. Finally, the sermons are subjected to a stylometric analysis, that is, a computer-based statistical analysis of literary style. This book will be welcomed by scholars of early Christianity, especially those interested in the life and works of Cyril of Jerusalem. Of special interest is its treatment of the history and development of liturgy in the Christian East through the fourth century. This is the first volume in the Patristic Monograph Series of the North American Patristic Society to be published by the Catholic University of America Press.

ABOUT THE AUTHOR Alexis James Doval is associate professor of religious studies at Saint Mary's College of California.

PRAISE FOR THE BOOK A considerable contribution to a vexed but vital question about Cyril and the mystagogical catecheses, Doval's study is a must for any patrologist interested in liturgical history and theology concerned about the resurgence of the Jerusalem church, studying the development of catechesis and catechumenate or exploring questions related to the controversies of the fourth century. Prof. Thomas Finn, College of William and Mary: The persistent question of authorship receives a comprehensive treatment in this work. The door on John's authorship of the mystagogical catechesis is not completely closed, but for Doval it remains an improbability at best. Barring new evidence, it will probably never be opened wide again in the wake of this study. William P. McDonald, *Journal of Early Christian Studies*: An important purchase for libraries which have patristic collections or collections in the history of doctrine and liturgy. Cecil R. White, *Catholic Library World*: Doval's cumulative case is compelling, and the onus must now be on those who dispute Cyril's authorship to justify continued dissent. An important contribution to studies of Cyril of Jerusalem and the fourth-century liturgy of the Holy City. Bryan D. Spinks, *Journal of Ecclesiastical History*: This book offers a very carefully defined structure and method for dealing with a highly complicated question. Pablo F. Argarate, *Toronto Journal of Theology*. *Poetry's Data*, Meredith

Martin, 2025-04-22. In this book, Meredith Martin presents a historical account of prosodic criticism and, through the example of her own research path, argues for new scholarly practices in literary studies and the humanities more broadly. Challenging the common scholarly practice of emphasizing one critical narrative, one pathway through history, or one author's reading, the book traces three arcs: the effects of the major shift in the late twentieth century from print-based to digital resources in scholarship with the emergence of the World Wide Web; Martin's experience as a scholar who coordinated a digital project about the history of the study of poetry, which led to the creation of the Princeton Prosody Archive and the founding of Princeton's Center for Digital Humanities (CDH); and the mix of computational and aesthetic elements in the study of prosody, including the study of versification and meter in the broader context of English literary study as a discipline. Across these three arcs, Martin argues that scholars must take seriously the idea of digital media as mediation through which textual forms are transformed into data and delivered to us via data structures, and that our reading of historical texts in digital forms must

reckon with these mediations She also demonstrates the connection between the intellectual labor of studying prosody or any historical object and the intellectual labor of fostering a collaborative research process This is a book she writes about the shifting grounds of knowledge production in the digital age and how we might situate ourselves amid these shifts by returning to of all things poetry
