## **A Guide To The Drakensberg:**

A Guide to the Drakensberg August Sycholt, 2002 Both natural history guide and travellers companion this book presents the many faces of South Africa's mighty eastern escarpment. It showcases the Drakensberg's pristine wilderness areas and its rich wildlife heritage, its historical significance preserved in abundant rock art and its fascinating geological make-up. At the same time it facilitates travel in the vast playground by providing maps, lists of walks and hikes graded for their degree of difficulty in the main reserves, recommended routes and sites, brief descriptions of towns and villages in the area and what they offer from a natural history and cultural standpoint, accommodation contact details and numerous practical tips. *A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands* Rodney Moffett, 2021-04-19 This bibliography includes scientific articles on the Drakensberg, Maloti and Adjacent Lowlands published between 1808 and 2019. Although focusing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished yet traceable reports, documents, presentations and dissertations these are also included. The bibliography has two parts: a complete list arranged alphabetically and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries to Rock Art with 502 entries.

[On Vision and Being Human: Exploring the Menstrual, Neurological and Symbolic Origins of Religious Experience](#) Bruce Rimell, 2015-07 Visionary and religious experiences are ubiquitous among human beings but why do we experience them as coming from a hidden reality beyond the senses Why should we believe in the existence of deities despite the mundane evidence of our own eyes Why do we as intelligent primates ascribe any importance to these imaginary realities at all This creative and speculative thesis seeks to

answer these questions in a new way gazing into the content of visions themselves and exploring the various inner realities that gave rise to these transformative and meaningful aspects of our humanity Focusing upon symbolic cognition as a fundamental organising principle of human experience a diverse series of musings upon the nature of reality consciousness and our evolutionary origins seeks to transcend our modern artificial boundaries to arrive at a holistic and delightfully playful human image for the twenty first century An original visionary thesis illustrated with 30 beautiful drawings
