20th ISPE International Conference on Concurrent Engineering C. Bil, J. Mo, J. Stjepandić, 2013-09-12 As a concept, Concurrent Engineering (CE) initiates processes with the goal of improving product quality, production efficiency, and overall customer satisfaction. Services are becoming increasingly important to the economy with more than 60% of the GDP in Japan, the USA, Germany, and Russia deriving from service-based activities. This book presents the proceedings of the 20th ISPE International Conference on Concurrent Engineering held in Melbourne, Australia, in September 2013. The conference had as its theme, Product and Service Engineering in a Dynamic World, and the papers explore research results, new concepts, and insights covering a number of topics including service engineering, cloud computing, and digital manufacturing; knowledge-based engineering and sustainability in concurrent engineering.

Reconstructing Project Management Peter W. G. Morris,2013-03-08 This hugely informative and wide ranging analysis on the management of projects past present and future is written both for practitioners and scholars Beginning with a history of the discipline s development Reconstructing Project Management provides an extensive commentary on its practices and theoretical underpinnings and concludes with proposals to improve its relevancy and value Written not without a hint of attitude this is by no means simply another project management textbook The thesis of the book is that it all depends on how you define the subject that much of our present thinking about project management as traditionally defined is sometimes boring conceptually weak and of limited application whereas in reality it can be exciting challenging and enormously important The book draws on leading scholarship and case studies to explore this thesis The book is divided into three major parts Following an Introduction setting the scene Part 1 covers the origins of modern project management how the discipline has come to be what it is typically said to be how it has been constructed and the limitations of this traditional model Part 2 presents an enlarged view of the discipline and then deconstructs this into its principal elements Part 3 then reconstructs these elements to address the challenges facing society and the implications for the discipline in the years ahead A final section reprises the sweep of the discipline s development and summarises the principal insights from the book This thoughtful commentary on project and program and portfolio management as it has developed and has been practiced over the last 60 plus years and as it may be over the next 20 to 40 draws on examples from many industry sectors around the
