A Handbook For Multicultural Studies In Elementary Schools:

A Handbook for Multicultural Studies in Elementary Schools Rosella Linskie, Howard Rosenberg, 1978 A Handbook for Multicultural Studies in Elementary Schools Rosella Linskie, Howard Rosenberg, 1978 **International Handbook of Research in Arts Education** Liora Bresler, 2007-09-04 Providing a distillation of knowledge in the various disciplines of arts education dance drama music literature and poetry and visual arts the Handbook synthesizes existing research literature helps define the past and contributes to shaping the substantive and methodological future of the respective and integrated disciplines of arts education While research can at times seem distant from practice the Handbook aims to maintain connection with the lived practice of art and of education capturing the vibrancy and best thinking in the field of theory and practice The Handbook is organized into 13 sections each centering on a major area or issue in arts education research These areas include History of arts education curriculum evaluation cultural centers appreciation composition informal learning child culture creativity the body spirituality and technology The individual chapters address cross cultural research related to the central theme of the section from the perspectives of the particular arts discipline Interludes provide reflective thoughts on the theme *Resources in Education* ,1997 **Social Science Record** ,1997 *Encyclopedia of Bilingualism and Bilingual Education* Colin Baker, Sylvia Prys Jones, 1998 This encyclopedia is divided into three sections individual bilingualism bilingualism in society and bilingual education It includes many pictures graphs maps and diagrams The book concludes with a comprehensive bibliography on bilingualism American Book Publishing Record Cumulative 1993 R R Bowker Publishing, 1994-03 Cited in BCL3 Sheehy and Walford Compiled from the 12 monthly issues of the ABPR this edition of the annual cumulation lists by Dewey sequence some 41 700 titles for books published or distributed in the US Entry information is derived from MARC II tapes and books submitted to R R Bowker an Funding Public Schools Kenneth K. Wong, 1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more

equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations

Language Arts ,1979 **Research in Education** ,1973 Rediscovering the Democratic Purposes of Education Lorraine McDonnell,P. Michael Timpane,Roger W. Benjamin,2000 Why do America s public schools seem unable to meet today s social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to

the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future
