Debus, 2016-06-21 From their discovery in the 19th century to the dawn of the Nuclear Age dinosaurs were seen in popular culture as ambassadors of the geological past and as icons of the life through time narrative of evolution They took on a more foreboding character during the Cold War serving as a warning to mankind with the advent of the hydrogen bomb As fears of human extinction escalated during the ecological movement of the 1970s dinosaurs communicated their metaphorical message of extinction urging us from our destructive path Using an eclectic variety of examples this book outlines the three fold evolution of dinosaurs and other prehistoric monsters in pop culture from their poorly understood beginnings to the 21st century *The Fossil Book* Patricia Vickers Rich, Thomas Hewitt Rich, Mildred Adams Fenton, Carroll Lane Fenton, 2020-01-15 Expanded edition of definitive guide for professionals and amateurs presents valuable information about finding preserving and studying fossils Over 1 500 drawings and photographs Readable and remarkably comprehensive Chicago Sunday Tribune *I Know Dino!* Sabrina Ricci, Garret Kruger, 2025-04-01 Get the deets on dinos and find out how we know what we know about them from the hosts of the popular podcast I Know Dino Dinosaurs have been extinct for millions of years but the world of dinosaur science has never been more alive Over the last few decades amazing scientific discoveries have transformed what we know about dinosaurs And it turns out that a lot of what we thought we knew about them was totally wrong Fortunately prehistory pros and podcast hosts Sabrina Ricci and Garret Kruger are here to parse dino fact from dino fiction and examine the incredible history of paleontology along the way Did you know scientists once thought Brachiosaurus could walk to the bottom of a lake and breathe through nostrils on top of its head False They also believed that Stegosaurus s back plates lay flat on its body like a turtle shell They didn t In this book you ll find fact packed profiles of your favorite dinosaur species You ll learn scientists often wrong first impressions of them and then find out how new discoveries changed our understanding Each profile is full of incredible dino illustrations including sketches of what we used to think each species looked like Sprinkled throughout the dinosaur profiles readers will also find features and sidebars all about dinosaur mysteries battles between paleontologists movie dinosaurs and more Science is alive and constantly changing and this fascinating colorful guide to the evolution of dinosaur knowledge shows us that there s always more to learn *Dino Safari* R.L.
