A Geographical Dictionary of Milton (Classic Reprint) Allan H. Gilbert, 2016-09-02 Excerpt from *A Geographical Dictionary of Milton* In a monograph originally intended as an introduction to this Dictionary and now complete in manuscript I have treated various matters relating to the poet's use of geography such as the sources of his knowledge of the subject his theory of its value in education the function of place names in his verse and the cosmography of *Paradise Lost* The publication of that work at the present time seems inadvisable yet I hope without too long delay to publish it in a separate volume In the *Geographical Dictionary* now presented I have given in alphabetic order the place names in Milton's prose and poetry except the addresses of the Letters of State and the Biblical quotations in *De Doctrina Christiana* and have endeavored so to explain these names especially those occurring in the verse as to reveal something of what they meant to the poet himself To this end I have drawn the quotations so far as possible from books he actually read 1 When this has been impossible I have quoted from representative books accessible to him About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Milton and the Natural World Karen L. Edwards, 2005-07-07 *Milton and the Natural World*

overturns prevailing critical assumptions by offering a fresh view of *Paradise Lost* in which the representation of Eden's plants and animals is shown to be fully cognizant of the century's new scientific natural history. The fabulous lore of the old science is wittily debunked and the poem embraces new imaginative and symbolic possibilities for depicting the natural world suggested by the speculations of Milton's scientific contemporaries including Robert Boyle, Thomas Browne, and John Evelyn. Karen Edwards argues that Milton has represented the natural world in *Paradise Lost* with its flowers and trees, insects and beasts as a text alive with meaning and worthy of close reading.
