A Glossary Of Southern African Architectural Terms:

Illustrated Glossary of Southern African Architectural Terms, English-isiZulu Franco Frescura, Philisiwe Joyce Myeza, 2016 Since 1994 South Africa has undergone a steady erosion of its indigenous built environment with a concomitant loss of indigenous building technology and its specialised terminology This glossary is based on the premise that readers cannot understand the culture of a people unless they have a grasp of the nuances and hidden meanings of the language The authors bring together in one volume the terminologies that are used by southern Africa's rural builders The terminology used by indigenous builders is included here as well as the terminology used by subsequent colonial white settlers including buildings of the so called Cape Dutch English Georgian Victorian and Indian Traditions The text is set out in alphabetical order It comprises each term in its original language its translation where appropriate into isiZulu and its definition in English and isiZulu One of the strengths of English isiZulu Glossary of Architectural Terms is its visual component of accompanying sketches that expertly illustrate the terms This book is designed not only to assist in the teaching of architecture but also to aid others who are interested in the field Researchers and practitioners in disciplines such as anthropology archaeology culture studies and building science will find it a valuable addition to their libraries Series UKZN Bilingual Glossary Series Subject Architecture African Studies Anthropology Art History

Colonial Architecture and Urbanism in Africa Fassil Demissie, 2016-12-05 Colonial architecture and urbanism carved its way through space ordering and classifying the built environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played a pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa
