A Good Planet Is Hard To Find:

Good Planets are Hard to Find Ilona Kickbusch, 1989 **Planet Quest** Ken Croswell, 1999 Are we alone In 1995 planet hunters discovered the first alien solar system around a star like our own Sun Ken Croswell tells the fascinating story of this discovery and the people who made it then explores the possibility that one day we may have the technology to travel to different solar systems and find life **This Impermanent Earth** Douglas Carlson, Soham Patel, 2021-09 With its thirty three essays This Impermanent Earth charts the course of the American literary response to the twentieth century s accumulation of environmental deprivations Arranged chronologically from 1974 to the present the works have been culled from The Georgia Review long considered an important venue for nonfiction among literary magazines published in the United States The essays range in subject matter from twentieth century examples of what was then called nature writing through writing after 2000 that gradually redefines the environment in increasingly human terms to a more inclusive expansion that considers all human surroundings as material for environmental inquiry Likewise the approaches range from formal essays to prose works that reflect the movement toward innovation and experimentation The collection builds as it progresses later essays grow from earlier ones This Impermanent Earth is more than a historical survey of a literary form however The Georgia Review s talented writers and its longtime commitment to the art of editorial practice have produced a collection that is as one reviewer put it incredibly moving varied and inspiring It is a book that will be as at home in the reading room as in the classroom **The Only Love That Lasts** Bryan Mcguire, 2004-06-29 *The Universal Sign* Siamak Akhavan, 2006-02-01 FREE E BOOK OR PRINTED BOOK VERSION PRICED AT THE COST OF PRINTING ONLY Join the quest to unravel Earth s lost history Accompany an ambitious and amusing fact filled journey and learn about the cataclysm that ended the last ice age the Biblical Flood the survivors struggles and myths and the events that have since shaped the world Discover the ancient origins of astronomy alchemy religion heresies empires wars humanity s historical amnesia and the true causes of our world conditions Uncover the real identity of Earth s historic rulers ancient gods God and the true nature of creation and its source This ambitious odyssey of epic proportions explores all such perplexing enigmas Mysteries whose origins lie in remote antiquity A forgotten lost history of Earth **Hearers and Doers** Kevin J. Vanhoozer, 2019-05-15 The foundation of discipleship is sound scriptural doctrine The value of sound doctrine is often misunderstood by the modern church While it can be dry and dull when it flows from the story of Scripture it can be full of life and love This kind of doctrine steeped in Scripture is critical for disciple making And it s often overlooked by modern pastors In Hearers and Doers Kevin Vanhoozer makes the case that pastors as pastor theologians ought to interpret Scripture theologically to articulate doctrine and help cultivate disciples scriptural doctrine is vital to the life of the church and local pastor theologians should be the ones delivering it to their communities With arresting prose and striking metaphors Vanhoozer addresses the most pressing problems in the modern church with one answer teach sound scriptural doctrine to make disciples Stereovision

Steve Eggleston,2013-09-24 Stereovision is a fictional drama about astrophysicist Philip Duke and his family and friends who help shape his life A thought provoking read that weaves through the lives of people with varying belief systems that make up the struggle of science vs religion You ll never look at our universe the same way again **Magic Apples** Lee

Walsh, 2008-06-03 This book is a brilliant use of metaphor that makes clear why the world leaves us feeling so uneasy **Nature & Culture** Council for Eco-philosophy, 2024-12-30 The eco philosophy which can be described as the pursuit of harmonious coexistence with the ecological constraints of growth originated in Norway during the period of rapid industrialisation following the Second World War Given the prevailing economic circumstances in Norway at the time the potential for utilising hydropower was viewed as a promising avenue for economic growth The pursuit of expedient pathways to the establishment of a welfare state led to the construction of numerous dams in mountainous regions In due course the development came under criticism with the author and lawyer Peter Wessel Zapffe noting the disappearance of waterfalls and the concomitant loss of the Norwegian mentality associated with them Nevertheless throughout the 1960s the conservation movement was unable to present arguments that could match the compelling data presented by the proponents of the industrial growth society Three Norwegians were instrumental in developing these arguments Chemical engineer Nils Faarlund made a significant contribution to the field of ecology introducing the concept of change with joy Professor Arne Naess provided a philosophical foundation for thought and action drawing upon the ethical and value based principles espoused by Baruch Spinoza and the non violence philosophy of Mahatma Gandhi Additionally Sigmund Kvaloy Setreng played a pivotal role in the advancement of political activism civil disobedience campaigns and the development of theoretical frameworks for movements resisting the industrial growth society *The Cincinnati Arch* John Tallmadge, 2004 What wilderness lover asks John Tallmadge would ever dream of settling deep in the Rust Belt astride polluted rivers The Cincinnati Arch holds the provocative answer to Tallmadge's question which was prompted by his unplanned relocation from rural Minnesota to urban Ohio Tallmadge tells of dismaying early encounters with the city's seeming bareness his growing awareness of its vitality and abundance and finally his new vision of all nature from the vacant lots of his neighborhood to our great New England forests and Western deserts New to the city Tallmadge saw only its concrete glass smog and debris Soon his interest stirred by the wonder of his children at their surroundings focused Tallmadge to the buzzing flapping scurrying chewing photosynthesizing life forms around him More deeply Tallmadge began to learn from and not just about the city Nature's persistence within him and wherever he looked wore away at old notions of wilderness that made no allowances for human culture The arch of the book's title is richly resonant as the name of a geologic formation molding the urban landscape Tallmadge comes to love as an archetypal

building form and in its parabolic shape as a metaphor for life's journey. Filled with luminous lessons of mindfulness, attentiveness, and other spiritual practices, this is a hopeful guide to finding nature and balance in unlikely places. **What Can I Do to Help Heal the Environmental Crisis?** Haydn Washington, 2019-10-01. The culmination of over three decades of writing by environmental scientist and writer Haydn Washington, this book examines the global environmental crisis and its solutions. Many of us know that something is wrong with our world; that it is wounded. At the same time, we often don't know why things have gone wrong or what can be done. Framing the discussion around three central predicaments—the ecological, the social, and the economic—Washington provides background as to why each of these are in crisis and presents steps that individuals can personally take to heal the world. Urging the reader to accept the reality of our problems, he explores practical solutions for change, such as the transition to renewable energy, rejection of climate denial, and the championing of appropriate technology, as well as a readjustment in ethical approaches. The book also contains 19 solution boxes by distinguished environmental scholars. With a focus on positive personal solutions, this book is an essential read for students and scholars of environmental science and environmental philosophy, and for all those keen to heal the world and contribute towards a sustainable future.
