**Design Review** Brenda C. Scheer, Wolfgang F.E. Preiser, 2012-12-06 That the topic of design review is somehow true My biases are clear from the start I am among those who believe that despite all signals to the contrary the physical structure of our environment agree on Beyond this however I suspect prospects of consensus are dim Differing opinions must be managed and that controlling it is on the subject likely range from those desiring the key to the amelioration of numerous problems control to those desiring freedom

Say one can confront society today I believe that design our physical and natural environments are going can solve a host of problems and that the design to hell in a hand basket Says the other design of the physical environment does influence be review boards are only as good as their members have more often than not their interventions produce Clearly this is a perspective that encompasses mediocre architecture more than one building at a time and demands As a town planner and architect I am sympathetic that each building understand its place in a larger context to the full range of sentiment Perhaps a context the city Indeed anyone proposing discussion of these two concepts control and physical solutions to urban problems is designing freedom and their differences would now be or as may seem more often the case destroying useful But let me instead suggest that both position the city
