A Guide For Motivating Youth:

The Will to Learn Martin V. Covington, 1998 This book introduces the basic principles of motivation as they apply to classroom learning and management in a readable non technical form Covington argues against the popular notion that the problems existing in schools today stem primarily from a lack of student motivation Instead he asserts that students are motivated sometimes even overly motivated but often for the wrong reasons Traditional teaching methods including conventional grading procedures and an emphasis on competition can contribute to student demoralization and Covington identifies the ways in which students respond to misguided incentives For some students motivation is directed at avoiding failure by avoiding participation For others demoralization leads to withdrawal from an educational system that they believe to be irrelevant to their lives Still other students are driven to prove their worth by outperforming fellow students The book suggests practical concrete ways that teachers can use classroom incentives to inspire a desire to learn Motivational Interviewing with Adolescents and Young Adults Sylvie Naar, Mariann Suarez, 2021-08-16 The significantly revised second edition of this unique practitioner guide features 65% new material and a new organizing structure The authors show how to use motivational interviewing MI to have productive conversations about behavior change with adolescents and young adults in any clinical context Noted for its clarity the book includes extended case examples sample dialogues quick reference tables and dos and don'ts It provides vital tools for helping young people open up about their struggles explore alternatives and make healthier choices around such concerns as substance use smoking anxiety medication adherence and obesity New to This Edition More integrative and cohesive every chapter weaves in diverse clinical issues replacing the prior edition's population specific chapters Chapters on MI in groups and involving caregivers in treatment Restructured around the current four process model of MI and proposes maintenance of change as a fifth process Incorporates the rapidly growing research base on MI with youth Reflects the ongoing refinement of the authors training approach includes skill building activities at the end of each chapter This book is in the Applications of Motivational Interviewing series edited by Stephen Rollnick William R Miller and Theresa B Moyers **Handbook of Children with Special Health Care Needs** David Hollar, 2012-07-15 Children with chronic conditions developmental disorders and birth defects represent a sizeable minority of American children as many as one in five Often their families have financial or other issues limiting their access to appropriate care thus limiting their adult prospects as well Compounding the problem many valuable resources concerning this population are difficult to access although they may be critical to the researchers practitioners and policymakers creating standards for quality care and services In response the Handbook of Children with Special Health Care Needs assembles research applied and policy perspectives reflecting the range of children's problems requiring special services Widely studied conditions e.g. communication disorders substance abuse and those receiving lesser attention e.g. tuberculosis are covered as are emerging ideas such as the medical home concept of continuity of care Its interdisciplinary outlook makes

Christenson,Amy L. Reschly,Cathy Wylie,2012-02-23 For more than two decades the concept of student engagement has grown from simple attention in class to a construct comprised of cognitive emotional and behavioral components that embody and further develop motivation for learning Similarly the goals of student engagement have evolved from dropout prevention to improved outcomes for lifelong learning This robust expansion has led to numerous lines of research across disciplines and are brought together clearly and comprehensively in the Handbook of Research on Student Engagement The Handbook guides readers through the field s rich history sorts out its component constructs and identifies knowledge gaps to be filled by future research Grounding data in real world learning situations contributors analyze indicators and facilitators of student engagement link engagement to motivation and gauge the impact of family peers and teachers on engagement in elementary and secondary grades Findings on the effectiveness of classroom interventions are discussed in detail And because assessing engagement is still a relatively new endeavor chapters on measurement methods and issues round out this important resource Topical areas addressed in the Handbook include Engagement across developmental stages Self efficacy in the engaged learner Parental and social influences on engagement and achievement motivation The engaging nature of teaching for competency development The relationship between engagement and high risk behavior in adolescents Comparing methods for measuring student engagement An essential guide to the expanding knowledge base the Handbook of Research on Student Engagement serves as a valuable resource for researchers scientist practitioners and graduate students in such varied fields as clinical child and school psychology educational psychology public health teaching and teachereducation social work and educational policy **Development of Achievement Motivation** Allan Wigfield,Jacquelynne S. Eccles,2002-02 This book discusses research and theory on how motivation changes as children progress through school gender differences in motivation and motivational differences as an aspect of ethnicity Motivation is discussed within the context of school achievement as well as athletic and musical performance Key Features Coverage of the major theories and constructs in the motivation field Focus on developmental issues across the elementary and secondary school period Discussion of instructional and theoretical issues regarding motivation Consideration of gender and ethnic differences in motivation *Understanding Learning and Motivation in Youth* Noemi Katznelson,Niels Ulrik Sørensen,Knud Illeris,2017-11-28 Through interviews with a selection of the most qualified and well reputed Northern European researchers Understanding Learning and Motivation in Youth explores and offers a range of solutions to one of the central problems in modern education motivation for learning The way that teaching is currently

delivered to students aged 11-19 often does not support positive learning the ongoing encouragement to produce as much competence as possible at the lowest possible costs elicits critical conditions for learning processes endangering not only the motivation of students but also the engagement and motivation of teachers themselves This book examines how this can be handled in practice by teachers and educators drawing on the perspectives of carefully selected experts to provide an introduction to the debates surrounding neoliberal education as well as a means to counteract the damages in their everyday teaching and activities With an original and accessible format and a unique insight into the thoughts of a select group of academics Understanding Learning and Motivation is essential reading for students researchers and academics studying the effects of neoliberal education as well as practicing teachers and educational leaders who are attempting to combat the problem

Cannabis Youth Treatment Series: Motivational enhancement therapy and cognitive behavioral therapy for adolescent Cannabis users : 5 sessions, 2001 **Helping Kids Achieve Their Best** Dennis M.

McInerney, 2006-05-01 This is a practical guide to motivating younger and older learners It looks at why some students are easier to motivate than others and why students lose motivation as they become older McInerney outlines strategies teachers can use in the classroom taking into account the needs of students from different backgrounds The book is richly illustrated with vignettes and case studies and includes questions and exercises to help teachers apply the suggested approaches in their own situations

The Psychology of Teaching and Learning in the Primary School David Whitebread, 2002-01-04 This book reviews recent work in psychology which sheds new light on important areas of concern to primary school teachers providing clear guidelines for good practice The Psychology of Teaching and Learning in the Primary School details the current controversies regarding the effective teaching of reading and numeracy how to deal with emotional and behavioural difficulties the best methods of assessing learning as well as teaching children to think and develop their creativity It is a useful text for tutors and students on initial teacher training courses and to teachers involved in professional development Each chapter contains an editor's summary a list of further reading a full list of references and activities to develop and deepen the readers understanding in each area At the same time the book is written in an accessible style ideal for the non psychologist and is well illustrated with practical classroom examples

Motivation and Practice for the Classroom, 2008-01-01 Motivation and Practice for the Classroom is a book for everyone concerned with the study of motivation in education Although there have been a number of notable contributions to the literature attempting to explain how students could excel in learning if only the conditions were right a perennial problem for teachers is putting these ideas into practice in their classrooms What seems to be lacking in the literature are evidence based claims about pedagogy and practice that are grounded in educational research at the classroom level and written in a style that is manageable for busy non specialist teachers The main theme of this edited volume is on aspects of motivation that are of relevance and application to the teaching practitioner It would also be useful to student teachers school administrators tertiary education lecturers

educational researchers and school administrators The collection of articles in this reader seeks to address one essential question how can classroom based research findings be used to improve the quality of teaching and motivation of students
