D. David Lapakko Ph. D., David Lapakko, 2009-10 *Argumentation Critical Thinking in Action* 2nd ed explores a wide variety of issues and concepts connected to making arguments responding to the arguments of others and using good critical thinking skills to analyze persuasive communication Key topics include the nature of claims evidence and reasoning common fallacies in reasoning traits associated with good critical thinking how language is used strategically in argument ways to organize an argumentative case how to refute an opposing argument or case cultural dimensions of argument and ways to make a better impression either orally or in writing *Wise Choices, Apt Feelings* Allan Gibbard, 1992 This treatise explores what is at issue in narrowly moral questions and in questions of rational thought and conduct in general It helps to explain why normative thought and talk so pervade human life and why our highly social species might have evolved to be gripped by these questions The author asks how if his theory is right we can interpret our normative puzzles and thus proceed toward finding answers to them **Getting Things Right** Conor McHugh, Jonathan Way, 2022-09-29 Some of our attitudes are fitting others unfitting It seems fitting to admire Mandela but not Idi Amin and to believe that the Seine flows through Paris but not that the Thames does Fitting attitudes get things right Conor McHugh and Jonathan Way argue that fittingness is the key to understanding the normative domain the domain of reasons obligations and value They develop and defend a novel fittingness first approach on which fittingness is a normatively basic property and all other normative properties depend on fittingness They show how this approach illuminates central questions in ethics and epistemology *Expand Your Capacity*

Pain, Pleasure, and the Greater Good Cathy Gere, 2017-10-19 How should we weigh the costs and benefits of scientific research on humans Is it right that a small group of people should suffer in order that a larger number can live better healthier lives Or is an individual truly sovereign unable to be plotted as part of such a calculation These are questions that have bedeviled scientists doctors and ethicists for decades and in *Pain Pleasure and the Greater Good* Cathy Gere presents the gripping story of how we have addressed them over time Today we are horrified at the idea that a medical experiment could be performed on someone without consent But as Gere shows that represents a relatively recent shift for more than two centuries from the birth of utilitarianism in the eighteenth century the doctrine of the greater good held sway If a researcher believed his work would benefit humanity then inflicting pain or even death on unwitting or captive subjects was considered ethically acceptable It was only in the wake of World War II and the revelations of Nazi medical atrocities that public and medical opinion began to change culminating in the National Research Act of 1974 which mandated informed consent Showing that utilitarianism is based in the idea that humans are motivated only by pain and pleasure Gere cautions that that greater good thinking is on the upswing again today and that the lesson of history is in imminent danger of being lost Rooted in the experiences of real people and with major consequences for how we think about ourselves and our rights *Pain Pleasure and the Greater Good* is a dazzling ambitious history

A Sketch of the one great Argument, formed from the several concurring evidences, for the truth of Christianity John ROTHERAM (D.D.), 1763 **The Oxford Handbook of Reasons and Normativity** Daniel Star, 2018 The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy and provides an authoritative guide to it Few concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something And one of the most contested ideas in philosophy is normativity the ought in claims that we ought to do or believe something This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields In addition to focusing on reasons in ethics epistemology and the philosophy of mind action and language the Handbook explores philosophical work on the nature of normativity in general Topics covered include the unity of normativity the fundamentality of reasons attempts to explain reasons in other terms the relation of motivational reasons to normative reasons the internalist constraint the logic and language of reasons and ought connections between reasons intentions choices and actions connections between reasons reasoning and rationality connections between reasons knowledge understanding and evidence reasons encountered in perception and testimony moral principles prudence and reasons agent relative reasons epistemic challenges to our access to
