time and space as well as the more traditional chapters on race class and gender This book shows how these social constructions of time space race gender and class intersect with each other to produce particular social phenomena that are enduring and significant for our society No other book for undergraduate teaching has ever done this this is a real first If the goal of this series is to broaden the students vision no book is more ambitious toward attaining that goal than Making Societies Roy helps students question the most natural of categories time space gender race and class Leading them through examples drawn from around the world he shows how these categories are social constructions historically formed ideologically loaded and subject to change This may be profoundly unsettling for students will be encouraged to question not only what they know but also the conceptual frameworks they use when they claim to understand anything As Series Editors it is our belief that this provocation will open new ways of thinking about the social world how it is and how it might be Wendy Griswold Series Editor Northwestern University from the foreword I love the organizing concept of the social construction of reality and using a cross cultural historical comparative approach to analyzing key themes space time race gender and class I particularly like the focus on space and time first because it illustrates how deeply embedded the social construction of reality is Joanne Defiore University of Washington Bothel The book is intellectually strong it is driven by ideas and engages important processes of social life Lisa Brush University of Pittsburgh Contributor to the SAGE Teaching Innovations and Professional Development Award
