A Brief History of Education Ellwood Patterson Cubberley, 1922

A Brief History of Education Ellwood P. Cubberley, 2015-07-06 Excerpt from *A Brief History of Education* A History of the Practice and Progress and Organization of Education The present volume is an abridgment and condensation of my History of Education issued in 1920 and has been prepared to meet the needs of normal schools and colleges which desire to teach the general history of education but which do not have the time or the inclination to go into the subject in such detail as is given in the larger volume above referred to The general plan of the two books is the same Like the larger History of Education the present volume is a history of the practice and progress and organization of education itself rather than a history of educational theory and presents the history of education as a phase of the history of the rise and development and spread of our Western civilization As in the larger volume I have tried here to present such a picture of the rise struggle for existence growth and recent great expansion of the idea of the improvability of the race and the elevation and emancipation of the individual through education as would be most illuminating and useful to students of the subject To this end I have traced the great forward steps in the emancipation of the intellect of man and the efforts to perpetuate the progress made through the organization of educational institutions to pass on to others what had been attained To this end I have tried to hold to the main lines of the story and have in consequence omitted reference to many theorists and reformers and events and schools which doubtless were important in their land and time but the influence of which on the main current of educational progress was after all but small For such omission I have no apology to make In their place I have introduced a record of world events and forces not included in the usual history of education which to me seem important as having contributed materially to the shaping and directing of intellectual and educational progress While in the treatment major emphasis has been given to modern times I have nevertheless tried to show how all modern education has been after all a development a culmination a flowering out of forces and impulses which go far back in history for their origin About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such

A History of Education in Modern Times (Classic Reprint) Frank Pierrepont Graves,2017-10-16

Excerpt from A History of Education in Modern Times More striking characteristics of the book will probably be found in the emphasis laid upon educational institutions and practices rather than upon theoretical development and in the larger place given to American education The account of each educational movement has included at least an attempt to trace its influence upon the content method and organization of education in this country while three chapters have been devoted exclusively to the rise of our educational system For this somewhat special point of View I trust that no apology is needed as the book is intended primarily for use in the United States and will be of service to our teachers largely as it succeeds in focusing the educational progress of this country It will be quite possible however for those readers in England and other countries who have been so hospitable in their reception of my former works to neglect or curtail these parts of the book and still have a body of material sufficient to represent satisfactorily the history of education during the past two centuries About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

A History of Education in the United States Edwin Grant Dexter,2015-06-16

Excerpt from A History of Education in the United States In presenting this volume under the dignified title of A History of Education in the United States I fully recognize that I may to many seem presumptuous Is our educational story they will say so small a matter as to be placed between two covers or is the author one of those dangerous complacents who knows not and knows not that he knows not Neither of these queries can be answered wholly in the negative for the complete narrative is a long one and no man can know it in all its details Yet the difficulty is not one which can mend itself with time If it were there might be less excuse for the present work which is offered more as a report of progress than as a final word upon the subject In its preparation I have been governed by the belief that the most crying need of the student of our educational history is a considerable mass of definite fact upon which to base his own generalizations or with which to interpret those of others rather than extended philosophical discussions of

historical trend Current educational literature is rich in the latter though comparatively barren of the former and when it does appear is of necessity disconnected That the work is then essentially institutional perhaps more appropriately termed a Chronicle than a History is a part of the plan and if a defect is one fully reckoned with for of two evils the lesser has seemed to me to be the omission of the philosophy rather than the fact About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

A History of Education in East Africa J. C. Ssekamwa,S. M. E. Lugumba,2001 Differing approaches have been used to establish formal education in East Africa This book traces developments from pre colonial indigenous systems to the pioneering work of missionaries and education during the colonial and post colonial periods The work is organised by country parts one to four systematically look at pre independence education in Kenya Uganda Tanganyika and Zanzibar part five gives a comparative analysis of education in the region since independence The authors academics at Makerere University argue that East African educational policies have brought about significant progress within the limits of resources The new challenge is what to do about the number of unemployed school leavers and graduates The authors refute the tendency to view the educated as victims of their own success and a potential social nuisance and instead argue they are a resource crucial to national development processes
