The Trade Trap Mathias Döpfner, 2023-09-19 Global business leader Mathias Döpfner offers a compelling Gideon Rachman chief foreign affairs columnist for Financial Times and revolutionary road map to reshape global trade strengthen our democracy and safeguard our freedoms Freedom is on the decline around the world Autocrats in Europe Asia and the Middle East are undermining our open societies human rights and the rule of law The Russian invasion of Ukraine was a wake up call for the West but the biggest threat remains China For two generations Americans and Europeans have believed that change will come through trade but instead of dictatorships becoming more like Western democracies unfettered free trade has strengthened our enemies and undermined our countries We are caught in a trade trap faced with the decision to choose either opportunism and submission or opposition and emancipation In Dealing with Dictators one of the world's most powerful business leaders traces the rise and costs of Western dependency on China and Russia And he suggests a radical new approach to free trade The establishment of a new values based alliance of democracies Membership is based on the adherence to three very simple criteria the rule of law human rights and sustainability targets Countries that comply with these criteria can engage in tariff free trade with others Those who don't will pay prohibitive tariffs Sharing the author's encounters with major global figures including Vladimir Putin Recep Tayyip Erdogan George W Bush Angela Merkel Jack Ma and more Dealing with Dictators offers personal insight into the dangerous consequences of doing business with autocrats along with a bold proposal for a values based trade policy

On Hunger Laura Westra, 2017-09-15 On Hunger focuses on the interface between food and public health and on the flawed regulations intended to protect us Food not only represents nourishment for the body it also possesses other valuable aspects that are protected by international legal instruments Westra argues for the importance of effecting radical changes to protect and improve the present system of food production

and distribution Starting from several reports produced by the FAO and the WHO Westra argues for the need of a complete and radical re evaluation of current practices and systems in order to meet the obligation of the international community to prevent hunger There is a particular emphasis on the problems facing the poor in the third world but also the different but equally grave problems of those in developed countries where the emphasis remains on corporate profit rather than on the protection of individuals as present dangers affect all starting from the children of all ages Most of the existing literature on hunger and food does not address the harm that current practices inflict on people globally Laura Westra's *On Hunger* focuses on the interface between food and public health and on the flawed regulations intended to protect us Food not only represents nourishment for the body it also possesses other valuable aspects that are protected by international legal instruments Westra argues for the importance of effecting radical changes to protect and improve the present system of food production and distribution This timely book explores every aspect of this challenge from the impact of climate change the role of the media and obligations to future generations Westra also considers the legality of financial contributions on the part of agribusiness to political figures and campaigns as well as their intrusion in the drafting of bills and regulatory regimes Finally the book highlights more positive developments including the expansion of the remit of the International Criminal Court to include environmental crimes *On Hunger* offers an original take on this increasingly important issue and will provide fascinating reading for scholars and students in law philosophy and human rights

Anne Morgan,2005-06 **The Fate of Desire** James S. Hans,1990-07-05 The Fate of Desire examines the problems of living in a decentered world Assuming that the poststructuralist declaration of the end of man is an essential aspect of our current ways of thinking the book focuses on the positive values inherent in this shift In substituting multiplicity and fields of play for identity and hierarchy and in distinguishing between desire as fullness and desire as lack Hans argues for a vision of existence that is based on the difficulties Nietzsche posited as an inevitable part of fully affirming the rich but tragic nature of life These reconceptions of the human scene redefine self discipline in terms of understanding and loving one s fate Instead of providing yet one more critique of the flawed values through which the Western world has constituted itself The Fate of Desire takes up the task of weighing the things of the world anew revaluing them in terms of our present understanding of our positions in the world Hans suggests that if we are fated to be driven by desire and if we are led to accept the ways in which our desire manifests itself according to our own individual fates there is still every reason to believe that humans can find a productive way of understanding and fully occupying their place in the world Process Photogram ,1895 **Hearings, Reports and Prints of the Senate Committee on the District of Columbia** United States.
