**Almost Perfect** Willard Eugene Peterson,1994 A former executive at the WordPerfect Corporation details the company's rise in the computer industry and what compelled him to leave after ten years as a driving force in the company

**AlmostPerfect** ,2010 *History of Computing: Software Issues* Ulf Hashagen,Reinhard Keil-Slawik,Arthur L. Norberg,2013-06-29 **A New History of Modern Computing** Thomas Haigh,Paul E. Ceruzzi,2021-09-14 How the computer became universal Over the past fifty years the computer has been transformed from a hulking scientific supertool and data processing workhorse remote from the experiences of ordinary people to a diverse family of devices that billions rely on to play games shop stream music and movies communicate and count their steps In A New History of Modern Computing Thomas Haigh and Paul Ceruzzi trace these changes A comprehensive reimagining of Ceruzzi's A History of Modern Computing this new volume uses each chapter to recount one such transformation describing how a particular community of users and producers remade the computer into something new Haigh and Ceruzzi ground their accounts of these computing revolutions in the longer and deeper history of computing technology They begin with the story of the 1945 ENIAC computer which introduced the vocabulary of programs and programming and proceed through email pocket calculators personal computers the World Wide Web videogames smart phones and our current world of computers everywhere in phones cars appliances watches and more Finally they consider the Tesla Model S as an object that simultaneously embodies many strands of computing **PC Mag** ,1994-05-17 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **Sweating Bullets** Robert Gaskins,2012-04-20 The PowerPoint quadranscentennial edition **Track Changes** Matthew G. Kirschenbaum,2016-05-02 Writing in the digital age has been as messy as the inky rags in Gutenberg's shop or the molten lead of a Linotype machine Matthew Kirschenbaum examines how creative authorship came to coexist with the computer revolution Who were the early adopters and what made others anxious Was word processing just a better typewriter or something more *A Bibliography of the Personal Computer* Roy A. Allan,2006 This eBook bibliography on the history of the personal computer and the industry contains over 280 book notations and over 250 periodical notations It also contains a reprint of an article by the author entitled What Was the First Personal Computer **Coding Places** Yuri Takhteyev,2012-09-21 An examination of software practice in Brazil that reveals both the globalization and the localization of software development Software development would seem to be a quintessential example of today's Internet enabled knowledge work a global profession not bound by the constraints of geography In Coding Places Yuri Takhteyev looks at the work of software developers who inhabit two contexts a geographical area in this case greater Rio de Janeiro and a world of practice a global system of activities linked by shared meanings and joint practice The work of the Brazilian developers Takhteyev discovers reveals a paradox of

the world of software it is both diffuse and sharply centralized The world of software revolves around a handful of places in particular the San Francisco Bay area that exercise substantial control over both the material and cultural elements of software production Takhteyev shows how in this context Brazilian software developers work to find their place in the world of software and to bring its benefits to their city Takhteyev's study closely examines Lua an open source programming language developed in Rio but used in such internationally popular products as World of Warcraft and Angry Birds He shows that Lua had to be separated from its local origins on the periphery in order to achieve success abroad The developers Portuguese speakers used English in much of their work on Lua By bringing to light the work that peripheral practitioners must do to give software its seeming universality Takhteyev offers a revealing perspective on the not so flat world of globalization

**From Airline Reservations to Sonic the Hedgehog** Martin Campbell-Kelly, 2004-02-27 A business history of the software industry from the days of custom programming to the age of mass market software and video games From its first glimmerings in the 1950s the software industry has evolved to become the fourth largest industrial sector of the US economy Starting with a handful of software contractors who produced specialized programs for the few existing machines the industry grew to include producers of corporate software packages and then makers of mass market products and recreational software This book tells the story of each of these types of firm focusing on the products they developed the business models they followed and the markets they served By describing the breadth of this industry Martin Campbell Kelly corrects the popular misconception that one firm is at the center of the software universe He also tells the story of lucrative software products such as IBM's CICS and SAP's R/3 which though little known to the general public lie at the heart of today's information infrastructure With its wealth of industry data and its thoughtful judgments this book will become a starting point for all future investigations of this fundamental component of computer history **PC Magazine**, 2004

**The Spatial Dynamics of the U.S. Computer Software Industry** Edmund Alfred Egan, 1997 Second Bibliographic Guide to the History of Computing, Computers, and the Information Processing Industry James W. Cortada, 1996-01-30

Complementing the author's 1990 bibliography A Bibliographic Guide to the History of Computing Computers and the Information Processing Industry this bibliography provides 2,500 new citations covering all significant literature published since the late 1980s It includes all aspects of the subject biographies company histories industry studies product descriptions sociological studies industry directories and traditional monographic histories and covers all periods from the beginnings to the personal computer New to this volume is a chapter on the management of information processing operations useful to both historians and managers of information technology Together with the earlier bibliography this work provides the most comprehensive bibliographic guide to the history of computers computing and the information processing industry The organization of the book follows that of the earlier work with the addition of the new chapter on the management of information processing All entries are new to this volume Titles are annotated and each chapter begins with a short

Cannon, Jessie Embry, 2009-06-15 The twentieth could easily be Utah s most interesting complex century yet popular ideas of what is history seem mired in the nineteenth One reason may be the lack of readily available writing on more recent Utah history This collection of essays shifts historical focus forward to the twentieth which began and ended with questions of Utah s fit with the rest of the nation In between was an extended period of getting acquainted in an uneasy but necessary marriage which was complicated by the push of economic development and pull of traditional culture demand for natural resources from a fragile and scenic environment and questions of who governs and how who gets a vote and who controls what is done on and to the contested public lands Outside trade and a tourist economy increasingly challenged and fed an insular society Activists left and right declaimed constitutional liberties while Utah s Native Americans become the last enfranchised in the nation Proud contributions to national wars contrasted with denial of deep dependence on federal money the skepticism of provocative writers with boosters eager for growth and reflexive patriotism somehow bonded to ingrained distrust of federal government Воля и Видение, Coding Places Yuri Vladimirovich Takhteyev, 2009
