*Pinning Down the Past* Mike Corbishley, 2014-04-17 In a relatively short period of time the pursuit of archaeology has evolved from an antiquarian interest to a specialised scientific activity Part of this evolution has always included the interest of the public and archaeologists efforts to educate them As each new method and technique is developed and each new specialism is created the challenge of making archaeology available as a learning resource grows with it Today for example the issues which surround archaeology and heritage such as the pressures of tourism on sites now form part of many formal educational curricula This book the first to deal with the subject in such depth examines the place of education and outreach within the wider archaeological community Written by one of Britain s leading archaeological educationalists it charts the sometimes difficult and painful growth and development of education and archaeology Packed full of informative and enlightening case studies from the circus at Colchester to Sutton Hoo and Hadrian s Wall this work examines exactly how we have reached the point we are at where that place is and suggests areas for future development By drawing upon many decades of experience at the front line of archaeological education the author has produced a key text that will play a major role in the on going development of the heritage industry Publisher s website

**The Power of Instructional Routines** Rebeca Itzkowich, Jie-Qi Chen, Anita Evans, Martha Pott. In this practical book, teachers reveal how instruction and assessment can be two sides of the same coin through the implementation of four literacy and math routines for pre-K to grade 3: Photo Chats, Counting Collections, Storytelling, Story Acting, and Numberless Word Problems. These routines offer rich observational data for ongoing formative assessments such as those used for kindergarten entry. They also provide embedded differentiation while offering teachers a window into their students' understanding. These culturally and linguistically responsive routines are designed to spark curiosity, build classroom community, and foster habits of mind for lifelong learning, transforming classrooms into dynamic thinking playgrounds. These economical routines require minimal materials preparation and classroom time. They have been field tested by over 250 public school teachers who use a wide range of curricula and work in urban, rural, and suburban settings with diverse students, including English language learners. This book demonstrates how these instructional routines worked for these teachers and how they can work for you, too.

**Book Features:** Authentic stories from nine public school kindergarten teachers about how they embraced the routines and noticed how learning blossomed for everyone. Descriptions of the four instructional routines are clearly presented so that they are ready to be tried by other teachers. Photographs of young children and their work samples with detailed descriptions and analysis from their teachers offering a glimpse into students' thinking. An exploration of the value of implementing ongoing instructional routines that are grounded in state-of-the-art research about language literacy and numeracy development within a multilingual framework. A framework of notice and wonder that connects teaching and assessment, offering a shift from the common practice that these are separate endeavors.
