**Alternative Schools in British Columbia 1960-1975**

Harley Rothstein, 2024-07-18 The tumultuous 1960s was an era of the counterculture political activism and resistance to authority. Conventions and values were challenged and new approaches to education captured the imaginations of parents, teachers, and students. Reacting against the one size fits all nature of the traditional public school system, groups of parents and teachers in Canada and the United States established alternative schools or free schools based on the Progressive child-centred philosophy of John Dewey and the Romantic ideas of Summerhill founder A. S. Neill. In *Alternative Schools in British Columbia 1960-1975*, Harley Rothstein tells the story of ten such schools that arose in the province of British Columbia. Drawing on 350 self-conducted interviews, newspaper articles, personal journals, and school records, Dr. Rothstein invites readers to experience the early days of alternative schools. He describes the educational philosophy, curriculum, and governance of these institutions and introduces readers to the people who were at the heart of alternative communities. Tracing the evolution, successes, and challenges of each school, he presents the day-to-day experience and brings to life the ethos of the 1960s era. Historians, educators, and all curious readers will become immersed in this engaging account of a group of educational pioneers on Canada's west coast and how they inspired the liberalization of the public school system that would come in the 1970s.

**Curriculum Studies** Craig Kridel, 2010-02-16 The *Encyclopedia of Curriculum Studies* provides a comprehensive introduction to the academic field of curriculum studies for the scholar, student, teacher, and administrator. The study of curriculum, beginning in the early 20th century, served primarily the areas of school administration and teaching and was seen as a method to design and develop programs of study. The field subsequently expanded to draw upon disciplines from the arts, humanities, and social sciences and to examine larger educational forces and their effects upon the individual, society, and conceptions of knowledge. Curriculum studies has now emerged to embrace an expansive and contested conception of academic scholarship while focusing upon a diverse and complex dynamic among educational experiences, practices, settings, actions, and theories in relation to personal and institutional needs and interests. The *Encyclopedia of Curriculum Studies* serves to inform and to introduce terms, events, documents, biographies, and concepts to assist the reader in understanding aspects of this rapidly changing field of study. Representative topics include: Origins, definitions, dimensions, and variations on Curriculum Studies; Curriculum development and design for schools; Curricular purpose, implementation, and evaluation; Contemporary issues, e.g., standards, tests, and accountability; Curricular dimensions of teaching and teacher education; Interdisciplinary perspectives on institutionalized curriculum; Informal curricula of homes, mass media, workplaces, organizations, and relationships; Impact of race, class, gender, health, belief, appearance, place, ethnicity, language; Relationships of curriculum and poverty, wealth, and related factors; Modes of curriculum inquiry and research; Curriculum as cultural

*Salvaging a Teenage Wasteland* Andrew J. Finch,2024-10-22 This book provides the first major historical account of the recovery high school movement from its beginnings in the alternative schools of the 1970s that overlapped with the first adolescent substance use treatment programs      Excellence for All Jack Schneider,2011 By the early twenty first century a startling consensus had emerged about the overall aim of American school reform In an era of political discord and in a field historically known for contentiousness the notion of promoting educational excellence for all students was a distinct point of bipartisan agreement Shaped by a corps of entrepreneurial reformers intent on finding what works and taking it to scale this hybrid vision won over the nation s most ambitious and well resourced policy leaders at foundations and nonprofits in state and federal government and in urban school districts from coast to coast Excellence for all might at first glance appear to be nothing more than a rhetorical flourish Who after all would oppose the idea of a great education for every student Yet it is hardly a throwaway phrase Rather it represents a surprising fusion of educational policy approaches that had been in tense opposition throughout the twentieth century those on the right favoring social efficiency and those on the left supporting

social justice This book seeks to understand why the excellence for all vision took hold at the time it did unpacks the particular beliefs and assumptions embedded in it and details the often informal coalition building that produced this period of consensus Examining the nation s largest urban school districts Los Angeles Chicago and New York the author details three major reform efforts in chapters titled The Right Space The Small Schools Movement The Right Teachers Teach for America and The Right Curriculum Expanding Advanced Placement

Public Relations in Schools Theodore J. Kowalski, 2011 For educational administration and leadership students studying school and community relations A contemporary and practice based school public relations text that centers on the importance of communication relationships and technology Outfitting students with a wealth of practical practice based knowledge that they can take directly into the halls of their school the new fifth edition of *Public Relations in Schools* has a fresh contemporary focus on both how administrators can effectively communicate with the community and how building strong relationships with stakeholders can ultimately lead to overall school improvement Through a blend of theoretical and tacit knowledge this text offers students an in depth guide to 1 how to successfully communicate with both internal and external school entities 2 how to build and maintain positive and active relationships via social and political capital and 3 how to translate the value of these relationships into positive change within the school While exploring these three central themes the book emphasizes how new technologies can aid school success At the same time real world case studies at the beginning of each chapter introduce readers to actual public relations issues and bring the material to life The revised fifth edition of *Public Relations in Schools* is updated with new materials and references throughout the text including two new chapters one on harnessing technology for your public relations needs and one on collecting assessing and applying public opinion In addition the new fifth edition text contains a matrix at the front of the book showing how content relates to ELCC NCATE Standards the widely used criteria for administrator preparation and licensing

**Making Up Our Mind** Sigal R. Ben-Porath, Michael C. Johanek, 2019-04-24 If free market advocates had total control over education policy would the shared public system of education collapse Would school choice revitalize schooling with its innovative force With proliferating charters and voucher schemes would the United States finally make a dramatic break with its past and expand

parental choice Those are not only the wrong questions they re the wrong premises argue philosopher Sigal R Ben Porath and historian Michael C Johanek in Making Up Our Mind Market driven school choices aren t new They predate the republic and for generations parents have chosen to educate their children through an evolving mix of publicly supported private charitable and entrepreneurial enterprises The question is not whether to have school choice It is how we will regulate who has which choices in our mixed market for schooling and what we as a nation hope to accomplish with that mix of choices Looking beyond the simplistic divide between those who oppose government intervention and those who support public education the authors make the case for a structured landscape of choice in schooling one that protects the interests of children and of society while also identifying key shared values on which a broadly acceptable policy could rest      **The American Dream and the Public Schools** Jennifer L. Hochschild, Nathan Scovronick, 2004-10-21 The American Dream and the Public Schools examines issues that have excited and divided Americans for years including desegregation school funding testing vouchers bilingual education and ability grouping While these are all separate problems much of the contention over them comes down to the same thing an apparent conflict between policies designed to promote each student s ability to succeed and those designed to insure the good of all students or the nation as a whole The authors show how policies to promote individual success too often benefit only those already privileged by race or class and often conflict with policies that are intended to benefit everyone They propose a framework that builds on our nation s rapidly changing population in order to help Americans get past acrimonious debates about schooling Their goal is to make public education work better so that all children can succeed      *The Education Digest* ,1978 The editorial aim is to present condensations of articles taken from the leading professional and lay publications      Education in a Free Society S.
