**Re-imagining Schooling for Education** Glenda McGregor, Martin Mills, Kitty Te Riele, Aspa Baroutsis, Debra Hayes, 2017-03-08 This book provokes a conversation about what supportive schooling contexts for both students and teachers might look like and considers how schooling can contribute to a more socially just society It takes as its starting point the position of the most marginalised students many of whom have either been rejected by or have rejected mainstream schooling and argues that the experiences of these students suggest that it is time for schools to be reimagined for all young people Utilizing both theory and data the volume critiques many of the issues in conventional schools that work against education and presents evidence from the field in the form of data from unconventional schooling sites which demonstrates some of the structural relational curricular and pedagogical changes that appear to be enabling schooling for education for their students It will be essential reading for students and researchers in the fields of education sociology and social work and will also be of great interest to practising teachers

*The Palgrave International Handbook of Alternative Education* Helen E. Lees, Nel Noddings, 2016-08-31 This state of the art comprehensive Handbook fully explores the field of alternative education on an international scale Alternatives to mainstream schooling and education are becoming increasingly recognised as pertinent and urgent for better understanding what really works in successfully educating children and adults today especially in light of the increased performance driven and managerially organised economic modelling of education that dominates For too long we have wondered what exactly education done otherwise might look like and here we meet individual examples as well as seeing what alternative education is when a collection becomes greater than the sum of parts The Handbook profiles numerous empirical examples from around the world of education being done in innovative and excitingly democratic and autonomous ways from Forest Schools and Home Education through to new technologies neuroscience and the importance of solitude The book also sets out important theoretical perspectives to inform us why seeing education through an alternative lens is useful as well as urgently needed Global in its perspective and definitive in content this one stop volume will be an indispensable reference resource for a wide

*Alternative Education* Mario D. Fantini, 1976 No two children are alike They have different needs they learn differently and at different rates have unique interests and talents as well as special problems In the past decade this age old fact has become increasingly obvious in our educational system We have come to realize the unavoidable doom of institutional uniformity and the absolute necessity of alternatives and choices which allow all students and not only those who can afford it to learn in the best possible situation for them Mario D Fantini one of the nation s best known spokesmen for alternatives in education has brought together important material which shows how this task can be and is being done in the educational system today He has compiled a handbook for parents students teachers and administrators who want to know how to improve education in their community Mario D Fantini is professor and Dean of education at the State University of New York at New Paltz He is author of *What s Best For The Children* also published by Anchor Press Doubleday

Alternative Educational Programmes, Schools and Social Justice Glenda McGregor, Martin Mills, Pat Thomson, Jodie Pennacchia, 2019-10-18 Alternative education caters and cares for students whose regular schools have failed and excluded them Fifty years of international research reports that alternative settings are characterised by close and powerful staff student relationships a curriculum which is relevant engaging and meaningful and the strong sense of agency afforded young people by the opportunity to make decisions Together these three practices produce increased life chances for alternative education participants However despite these apparent successes alternative education seems to have had little impact on mainstream schools This collection of papers addresses the important question what might regular schools and teachers learn about socially just pedagogies from alternative education practices In providing answers to this question authors interrogate the taken for granted wisdom about alternative education while also taking account of ongoing policy shifts differing locations and populations and persistent and intersecting patterns of raced classed and gendered inequalities They draw on a range of theoretical and methodological approaches to interrogate the ways in which alternative schools and alternative education both challenge and legitimate the kinds of schooling most of us expect for our own and other people s children The chapters in this book were originally published as a special issue of *Critical Studies in Education*

The Hows and Whys of Alternative Education Darlene Leiding, 2008 *The Hows and Whys of Alternative Education* offers the essential information on the history of alternative education school choice alternative schools charter schools magnet schools homeschooling private schools vouchers distance learning teacher student parent attraction and the future of educational choice

Alternatives in Education Vernon H. Smith, Robert D. Barr, Daniel J. Burke, 1976

**School is Dead: Alternatives in Education** Everett W. Reimer, 1971 In this startling indictment Everett Reimer strips away traditional idolatry and currently fashionable procedural criticism and gets down to the nub our school systems are over costly monopolistic institutions with more kinship to slavery than to education which set their own rules and definitions and permanently

penalize those who don't conform institutions that promise the world and are the very instruments of its denial The book evaluates the school system not by its own standards but in terms of what school is supposed to accomplish and finds it fatally lacking It must be replaced the author cogently argues by multiple radical alternatives suited to the multiple needs of the young and designed to bring about a truly free society      **Philosophical Alternatives in Education** Gerald Lee
