The Course of American Economic Growth and Development Hacker,Louis Morton Hacker,1970 **The Course of American Economic Growth and Development** Louis Morton Hacker,1977 **Essays on a Mature Economy: Britain After 1840** Deirdre McCloskey,2013-11-05 These unique papers were originally read at a conference on the new economic history of Britain at Harvard in 1970 and each is accompanied by a summary of the discussion that followed it The participants of the conference represented a broad range of scholars from both sides of the Atlantic The first eleven papers deal with a variety of topics covering a period from 1840 to the 1920s They focus on the performance of the British economy and especially its businessmen during the time of Britain s industrial maturity and relative decline The papers and discussions reached a novel conclusion tha contrary to commonly held opinion the British economy performed well and that British businessmen were not lacking in entrepreneurial vigour compared with their German or American counterparts But even more important for British historiography than this finding was the demonstration that economic and statistical methods can be applied successfully to the study of economic history The papers in the concluding section discuss the origins and development of the new economic history and show that as a substantial supplement to work along more traditional lines its methods and application are both desirable and possible This collection serves as an interesting report of research into a key period in British history and also as a useful introductory account of the new economic history in the United Kingdom This book was first published in 1971 *Catalog of Copyright Entries. McCloskey,2015-03-08 Debating the promises and limits of the new economic history seventeen economists and economic historians look at Great Britain from the peak of her industrial dominance in 1840 to her eclipse by the surging economies of Germany and the United States Their discussion brings a new methodological challenge to the field of economic history and a new interpretation of the British economy in the nineteenth and early twentieth centuries Originally published in 1972 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *American Educational History* William Jeynes,2007-01-24 American

Filmonomics André de Palma,Luc Leruth,2025-04-08 What could movies as diverse as The Last Samurai Cl o from 5 to 7 or Dr Strangelove have in common Filmonomics has a simple yet intriguing answer economics as the main driving force of the plot or as the main motivation of the characters actions This book analyses how movie makers use economic and financial motives in their plots or to build their characters Have they done it in line with economic theory Or are they proposing a new angle a new perspective that economists should take note of The authors here do not discuss wages in the film industry or the economics of movies What interests them is the economic motivations underpinning the behaviour of fictional characters in their favourite films They argue that credible movie characters can behave in irrational ways and movie makers occasionally introduce new ideas that economists should take note of A unique contribution this book will be of interest to readers eager to discover what economists have to say about films and film directors It will be indispensable for students and researchers of economics media studies film studies and cultural studies Handbook of Development Economics Hollis Chenery,Hollis Burnley Chenery,1988 Economics development concepts and approaches structural transformation human resources and labor markets planning and resource allocation international aspects country experience with development
