The Birth of Technology in Mesoamerica Ethan Gomez, For thousands of years people in Central America have found ways to improve their lives Tools and technologies help us do more work with less effort and make our lives easier But how did those tools and technologies come about The Maya people were among the first groups to make discoveries that led to new technology in Mesoamerica And now scientists uncover more about these ancient people by using modern technologies like computers and lasers In the past people could only see the universe in one way They could not travel very far or very fast But now that science and technology have changed the world we can see things that were hidden before We have new ways of getting from one place to another and new tools and materials that help us make textiles boats and paper and even understand the past Technology has improved in many ways like finding better ways to get from one place to another For example modern technology has made transportation faster easier and more efficient than it used to be Traveling long distances is much easier than before the invention of trains cars and airplanes Education depends mainly on how effective teaching methods were used back then compared to today s standards therefore without proper instruction methods being utilized by teachers back then there wouldn t be any hope for students success later on down their own paths towards achieving higher learning goals Once again it was scientists using modern technology to help us learn more about the ancient Maya people In Mexico scientists have also studied the old Maya people using modern technology They have discovered that they were more advanced than we thought not just farmers and traders but builders as well The Maya had many things we take for granted today like electricity and airplanes but they also had inventions like books and clocks which we don t have today These discoveries show that even though these fantastic people lived thousands of years ago they could still invent new things back then just like when someone created something today like a bike Archaeologists have found artifacts showing how vital these things were to how these ancient people lived In archaeology the word artifact refers to any object left behind by people in the past Artifacts can be made of many materials including wood stone and metal Archaeologists study these things to learn more about the people who made them and how they lived A few discoveries have revealed things about the ancient people we never knew For example researchers now know that Mayan culture was more advanced than previously thought The old Maya had a complex social structure religious system and calendar that was far more developed than what was once understood by modern day archaeologists They also had a problematic transportation and textile system all previously misunderstood by archaeologists who studied the civilization s remains The world has changed a lot since the ancient Maya lived But there is still so much we don t know about how they lived and what they thought That s why scientists study these artifacts today They want to learn more about them and their culture so we can learn from them too
