Awaiting the Therapist's Baby April E. Fallon, Virginia Brabender, 2003-01-30 The passage into and through pregnancy and new parenthood is one that affects all aspects of a therapist's life including work with patients. It presents special therapeutic challenges as well as special therapeutic opportunities. Drawing on the scattered literature, interviews with people who have been in the roles of therapists and expectant parents simultaneously and their own rich experiences, the authors consider therapists' psychological lives prior to birth or adoption and examine both therapist and patient reactions to the reality of a coming child. Whatever the therapist's theoretical orientation, the patient-therapist relationship undergoes changes and therapists are faced with a number of important decisions not typically addressed in the psychotherapy literature, such as whether and when to inform the patient of what is anticipated. The authors offer practical advice that enables therapists to proceed through a sound clinical decision-making process and discuss the ways in which the changes can be harnessed in the service of treatment goals. Multiple modalities are covered, including individual, group, family, and couples therapy, which can be understood from a variety of theoretical perspectives. The needs of patients in different diagnostic categories at different developmental stages are addressed, and the relationship between therapist and practice setting is examined. Throughout, the authors illuminate their points with vivid real-life case vignettes. The issue of impending parenthood arises for male and female practitioners, adopters, and biological parents and their supervisors. All those facing it will find this book essential reading as they seek to identify and quell their anxieties and improve their clinical acumen and effectiveness.

Manual of Gender Dermatology Lawrence Charles Parish, 2011 The Manual of Gender Dermatology is a research-based guide to the mechanisms of gender differentiation for common dermatologic conditions. Key topics include hormonal differences, genetic background, gender psychology, environmental effects, and a wide range of skin disorders that may have a gender bias. Written by experts in the fields of dermatology and cutaneous biology, this is an essential resource for practicing dermatologists and family practitioners as well as for physician extenders, nurses, and students.

Adult Development and Aging Klaus Warner Schaie, Sherry L. Willis, 2002 This comprehensive book helps readers process a clear picture of adult development and aging with the help and results of intensive scientific research. It challenges common stereotypes about this subject matter and interprets the research data into an optimistic yet realistic appraisal of the many problems faced by the elderly in today's society. Chapter topics look at independence and intimacy in young adulthood, responsibility and failure in the middle years, the reintegration or despair of later life, research methodology, families, careers, personality development, learning and memory, intellectual and biological development, mental disorders, and death and bereavement. For individuals who want to view the potential richness of life at all stages and/or understand the lives of older adults they may care for.
