**Company Tax Reform in the European Union** Joann Martens-Weiner, 2006-03-14 Having spent almost fifty years of my life defending the separate accounting arm s

length pricing method I have to admit that I was somewhat surprised to be asked to contribute to a book suggesting that the European Union might do well to consider adopting a formulary approach to deal with the taxation of inter and intra company transactions I was even more surprised to see the invitation coming from Ms Joann Weiner an ardent co defender of arm s length pricing and my strong right arm in that regard while we both served in the U S Treasury Department in the mid 90s The book gives Ms Weiner the opportunity to comment frankly from an insider s perspective of the many admitted problems of the arm s length system which could be avoided by a formulary approach Ms Weiner brings to this project a thorough expert knowledge of the b efits and shortfalls of each of the systems she discusses separate accounting v formulary apportionment Who better to decide to give qualified support to formulary than someone who organized a U S Treasury conference to defend arm s length pricing against a Congressional challenge in favor of formulary apportionment
