Kentucky One Room School Teachers oral historian William Lynwood Montell reclaims an important part of Kentucky's social cultural and educational heritage assembling a fascinating collection of schoolroom stories The firsthand narratives and anecdotes in this collection cover topics such as teacher student relationships day to day activities lunchtime foods students personal relationships and of course the challenges of teaching in a one room school Montell includes tales about fund raising pie suppers pranks outrageous student behavior such as the quiet little boy whose first sharing involved profanity and many other topics Montell even includes some of his own memories from his days as a pupil in a one room school

ECSCW 2001 Wolfgang Prinz,Matthias Jarke,Yvonne Rogers,K. Schmidt,Volker Wulf,2007-05-08 Schmidt and Bannon 1992 introduced the concept of common information space by contrasting it with technical conceptions of shared information Cooperative work is not facilitated simply by the provisioning of a shared database but rather requires the active construction by the participants of a common information space where the meanings of the shared objects are debated and resolved at least locally and temporarily Schmidt and Bannon p 22 A CIS then encompasses not only the information but also the practices by which actors establish its meaning for their collective work These negotiated understandings of the information are as important as the availability of the information itself The actors must attempt to jointly construct a common information space which goes beyond their individual personal information spaces The common information space is negotiated and established by the actors involved Schmidt and Bannon p 28 This is not to suggest that actors understandings of the information are identical they are simply common enough to coordinate the work People understand how the information is relevant for their own work Therefore individuals engaged in different activities will have different perspectives on the same information The work of maintaining the common information space is the work that it takes to balance and accommodate these different perspectives A bug report in software development is a simple example Software developers and quality assurance personnel have access to the same bug report information However access to information is not sufficient to coordinate their work English for Life 2 Cecil Gray,1993 A four book course satisfying all language needs for lower secondary to CSEC examination level Operations Research Problems Raúl Poler,Josefa Mula,Manuel Díaz-Madroñero,2013-11-08 The objective of this book is to provide a valuable compendium of problems as a reference for undergraduate and graduate students faculty researchers and practitioners of operations research and management science These problems can serve as a basis for the development or study of assignments and exams Also they can be useful as a guide for the first stage of the model formulation i e the definition of a problem The book is divided into 11 chapters that address the following topics Linear programming integer programming non linear programming network modeling inventory theory queue theory tree decision game theory dynamic programming and markov processes Readers are going to find a considerable number of statements of operations research applications for management decision making The solutions of these problems are provided in a concise way although all topics start with a more developed resolution The proposed

problems are based on the research experience of the authors in real world companies so much as on the teaching experience of the authors in order to develop exam problems for industrial engineering and business administration studies
