Many people, especially nonprofessional administrators of home or small business networks, feel helpless. In this book technical security expert Philip Alexander explains in layman's terms how to keep networks and individual computers safe from the bad guys. In presenting solutions to these problems and many others, the book is a lifeline to those who know their computer systems are vulnerable to smart thieves and hackers, not to mention tech-savvy kids or employees who are swapping music files, stealing software or otherwise making a mockery of the word security. In his job protecting data and combating financial fraud, Philip Alexander knows well which power tools are required to keep hackers and thieves at bay. With his gift for putting technical solutions in everyday language, Alexander helps readers with home and/or small business networks protect their data, their identities and their privacy using the latest techniques. In addition, readers will learn how to protect PDAs and smartphones, how to make hardware thefts more unlikely, how to sniff out scammers and the motives of offshore tech support personnel who ask too many questions, and how to keep personal information safer when shopping over the Internet or telephone. *A Guide on: How to Protect Your Personal Information* Sandra Raby, M.Ed. and Lisa Ruggeri, MAOM, 2006-09-27 Have you ever run yourself on the Internet, either in a search engine or a database, and had all your personal identifying information come up? Information that may show up could include your name, home address, home phone number, birth date and social security number. Did you ever wonder how that information got there and why they have your date of birth and social security number? Did you know there are things you do on a daily basis that put your personal identifying information into publicly available

information sources It could be something as simple as ordering pizza and having it delivered to your house filling out a credit application or having your creditor sell your personal information This book will explain the difference between public record and publicly available information It will also explain the ways your information gets released and how it ends up on the Internet This is an information sharing industry that most people are not even aware exists There are steps described as the protection process which can be taken to help you start protecting your personal identifying information from being released There may be times when you can not stop your information from being released but there are things you can do to control what information is released Anyone who has a desire to protect their personal identifying information and their family members information from being released and made available on the Internet will benefit from learning about the protection process This step by step guide was created with two objectives in mind the first heightening your awareness on the sale and release of your personal identifying information and the second providing you with strategies you can implement to start protecting yourself and your family
