Eysenck, 2017-07-05 Hans Eysenck is one of the world's leading psychologists and undoubtedly the most controversial. Throughout a long and illustrious career his work on personality and intelligence has aroused impassioned debate and attacks both verbal and physical on Eysenck himself. In his compelling and absorbing autobiography Eysenck recounts in some detail the battles he had to fight in order to establish his major conclusions as well as the reasons why he investigated these subjects. He also discusses his work on such topics as the health hazards of smoking, the prophylactic effects of behavior therapy on cancer and coronary heart disease, parapsychology, astrology and other matters. In a new foreword written for this edition Eysenck expresses his pleasure regarding the fact that his autobiography is now being published in the United States. He discusses how much of his scientific life has been bound up with American psychology. Also new to this American edition is a chapter titled 'Genius, Creativity and Vitamins' in which Eysenck talks about the research he has worked on since his retirement in 1983. *Rebel with a Cause* is an intriguing autobiography and will be of paramount interest to psychologists, sociologists and genetic scientists.      **A Minister's Handbook of Mental Disorders** Joseph W.
