Ultrafast Nonlinear Optics Robert Thomson,Christopher Leburn,Derryck Reid,2013-03-20 The field of ultrafast nonlinear optics is broad and multidisciplinary and encompasses areas concerned with both the generation and measurement of ultrashort pulses of light as well as those concerned with the applications of such pulses Ultrashort pulses are extreme events both in terms of their durations and also the high peak powers which their short durations can facilitate These extreme properties make them powerful experiment tools On one hand their ultrashort durations facilitate the probing and manipulation of matter on incredibly short timescales On the other their ultrashort

durations can facilitate high peak powers which can drive highly nonlinear light matter interaction processes Ultrafast Nonlinear Optics covers a complete range of topics both applied and fundamental in nature within the area of ultrafast nonlinear optics Chapters 1 to 4 are concerned with the generation and measurement of ultrashort pulses Chapters 5 to 7 are concerned with fundamental applications of ultrashort pulses in metrology and quantum control Chapters 8 and 9 are concerned with ultrafast nonlinear optics in optical fibres Chapters 10 to 13 are concerned with the applications of ultrashort pulses in areas such as particle acceleration microscopy and micromachining The chapters are aimed at graduate student level and are intended to provide the student with an accessible self contained and comprehensive gateway into each subject
