Bratcher, Howard Hatton, 1993 A verse by verse analysis and commentary on Revelation by recognized biblical translation experts Focuses special attention on critical words and phrases explaining accepted interpretations noting how various translations have handled these passages and often explaining the nuances of the Greek text *Lexical Dependence and Intertextual Allusion in the Septuagint of the Twelve Prophets* Myrto Theodorou, 2012-05-24 This book explores various aspects of intertextuality in the LXX Twelve Prophets with a special emphasis on Hosea Amos and Micah Divided into five parts the first introduces the topic of intertextuality discusses issues relating to the Twelve Prophets and their translator and concludes with various methodological considerations Chapter two deals initially with the lexical sourcing of the prophets in their Hellenistic milieu and tests proposed theories of influence from the Pentateuch The rest of the book examines specific cases from the books of Hosea Amos and Micah The third chapter deals with standard expressions used by the translator even in places where the Hebrew does not correspond The fourth chapter investigates the use of catchwords that the Greek translator identified in his Hebrew Vorlage and that function for him as links between two or more texts Finally the fifth chapter examines cases where the translator understands the text to be alluding to specific biblical stories events and characters of particular interest in Hellenistic Judaism *Amos, Obadiah, Jonah* Billy K. Smith, Franklin S. Page, 1995 One in an ongoing series of esteemed and popular Bible commentary volumes based on the New International Version text

**Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff, R R Bowker Publishing, 1996-09      Literary Structure and Rhetorical Strategies in The Hebrew Bible L.J. de Regt, J. de Waard, J.P. Fokkelman, 2023-08-14 Analysis of text structures has been a dominant feature in Biblical studies for quite some time. More recently, scholars have focused on rhetorical strategies that have been employed in Biblical texts. In this volume, rhetorical as well as structural approaches to the Hebrew Bible have been brought together. It contains studies on a range of topics and on a good many texts and textual corpora. Interpretation culminates in translation. The contributors to this volume have discussed the implications of their findings for Bible translators. Many of these translational implications have been put together in an epilogue. The volume thus not only intends to show the present state of our knowledge of literary and rhetorical techniques employed in the Bible, on these points it aims to be a selective guide to translators as well. The volume has been edited by Lenart de Regt, Jan de Waard, both of the Free University of Amsterdam and Jan Fokkelman, Leiden University.

**A Handbook on Psalms** Robert G. Bratcher, William David Reyburn, 1993 Verse by verse analysis of Psalms with commentary by recognized biblical translation experts. Focuses on critical words and phrases, explaining accepted interpretations, noting how various translations have handled passages and explaining the nuances of the Hebrew original text.

*The Oxford Handbook of Austrian Economics* Peter J. Boettke, Christopher J. Coyne, 2015 The Austrian School of Economics is an intellectual tradition in economics and political economy dating back to Carl Menger in the late 19th century. Menger stressed the subjective nature of value in the individual decision calculus. Individual choices are indeed made on the margin, but the evaluations of rank ordering of ends sought in the act of choice are subjective to individual choosers. For Menger, the economic calculus was about scarce means being deployed to pursue an individual's highest valued ends. The act of choice is guided by subjective assessments of the individual and is open ended as the individual is constantly discovering what ends to pursue and learning the most effective way to use the means available to satisfy those ends. This school of economic thinking spread outside of Austria to the rest of Europe and the United States in the early 20th century and continued to develop and gain followers, establishing itself as a major stream of heterodox economics. The Oxford Handbook of Austrian Economics provides an overview of this school and its theories. The various contributions discussed in this book all reflect a tension between the Austrian School's orthodox argumentative structure, rational choice and invisible hand, and its addressing of a heterodox problem: situations of uncertainty, differential knowledge, ceaseless change. The Austrian economists, from the founders to today, seek to derive the invisible hand theorem from the rational choice postulate via institutional analysis in a persistent and consistent manner. Scholars and students working in the field of History of Economic Thought, those following heterodox approaches, and those both familiar with the Austrian School or looking to learn more will find much to learn in this comprehensive volume.

**Lamentations** William D. Reyburn, William David Reyburn, 1992 Concentrates on exegetical information important for translators and attempts to indicate possible solutions for translational problems related to language or culture The authors do not consciously attempt to provide help that other theologians and scholars may seek but which is not directly related to the translation task Special attention has been given to the poetic structure so that the translator will be able to understand the movement and the logical progression of the sections of this book and how they contribute to the message of the whole
