appearance function and adoption by riders **The History of Cycling in Fifty Bikes** Tom Ambrose,2013-10-15 The invention of the bicycle changed history by democratizing travel for the first time The common man and importantly the common woman could now afford to travel at reasonable speed without the need of a horse Instead of walking just 10 miles a day on foot a healthy individual could now ride up to 80 miles on a cycle at a relatively modest cost Today despite the prevalence of the car the bicycle is as important as ever More cycles appear on city streets each year offering healthy pollution free transport Commuters cycle to work through congested traffic urban hire bike schemes are increasingly common and the sports of road and track racing continue to gain in popularity For an invention with a history of just 200 years the simple bicycle has changed the world in many ways From the Velocipede to the Pinarello *The History of Cycling in Fifty Bikes* by Tom Ambrose relates this history by telling the stories of 50 iconic machines that have shaped the world

Early American Bicycle Works Robert L. McCullough, 2025-04-12 Few inventions rival the bicycle's global reach Even fewer have maintained their fundamental design for more than 130 years a feat achieved by the true safety bicycle after 1890 With two equal sized wheels a diamond frame rear wheel chain drive and pneumatic tires its design is globally recognizable Despite its cultural significance the bicycle remains inadequately represented in our built and cultural environments This book explores the history of the early American bicycle industry It examines factory complexes worker housing and urban plans that go back to America's seminal period of bicycle manufacturing which began in 1878 with the production of elegant high wheel models By studying the architecture engineering and inventions of bicycle design and manufacture this research sheds light on various aspects of the industry during its early years and contributes to the preservation of cycling's nineteenth century heritage within our built environment

Cycling and Society Dave Horton, Paul Rosen, Peter Cox, 2016-05-13 How can the social sciences help us to understand the past present and potential futures of cycling This timely international and interdisciplinary collection addresses this question discussing shifts in cycling practices and attitudes and opening up important critical spaces for thinking about the prospects for cycling The book brings together for the first time analyses of cycling from a wide range of disciplinary backgrounds including history sociology geography planning engineering and technology The book redresses the past neglect of cycling as a topic for sustained analysis by treating it as a varied and complex practice which matters greatly to contemporary social cultural and political theory and action *Cycling and Society* demonstrates the incredible diversity of contemporary cycling both within and across cultures With cycling increasingly promoted as a solution to numerous social problems across a wide range of policy areas in car dominated societies this book helps to open up a new field of cycling studies
