British Naval Trawlers and Drifters in Two World Wars Steve Dunn, 2021-12-30 John Lambert was a renowned naval draughtsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts By the time of his death in 2016 he had produced over 850 sheets of drawings many of which have never been published These were acquired by Seaforth and this title is the fourth of a planned series of albums on selected themes reproducing complete sheets at a large page size with expert commentary and captioning Trawlers and drifters served in both world wars in their thousands and in their tens of thousands so did their fishermen crews Indeed these humble craft were the most numerous vessel type used by the Royal Navy in both wars and were the answer to the strategic or tactical

conundrums posed by new technology of mines and submarines In his accompanying text Steve Dunn examines the ships themselves their design construction arming operations and development and he also relates how the trawlermen and skippers from the age old fishing ports of Grimsby Hull Lowestoft ad Great Yarmouth Aberdeen and Fleetwood came to be part of the Royal Navy and describes the roles they played the conditions they served under and the bravery they showed The book takes some 30 large sheets of drawings which John Lambert completed of these vessels and divides into two sections The first part tells how the fishing fleet came to be an integral part of the Royal Navy s pre 1914 plans and details some of the activities and actions of trawlers and drifters at war in 1914 18 And the second investigates the armed fishing fleet in the struggle of 1939 45 These wonderfully detailed drawings which are backed by a selection of photographs and a detailed complementary text offer a superb technical archive for enthusiasts and ship modellers but the book also tells a fascinating story of the extraordinary contribution the vessels and their crews made to the defeat of Germany in two world wars

British Naval Weapons of World War Two, Volume III Norman Friedman, 2020-07-30 Lambert was a drafter of no mean skill his drawings are concise clear and invaluable to scratchbuilders and super detailers Very highly recommended Nautical Research Journal John Lambert was a renowned naval draftsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts By the time of his death in 2016 he had produced over 850 sheets of drawings many of which had never been published Now they have become available in these remarkable collections with expert commentary and captioning included The initial volumes concentrate on British naval weaponry used in the Second World War thus completing the project Lambert was working on when he died His interest was always focused on smaller warships and his weapons drawings tend to be of open mountings the kind that present a real challenge to modelmakers rather than enclosed turret guns but he also produced drawings of torpedo tubes underwater weapons fire control directors and even some specific armament related deck fittings Following the earlier volumes on destroyer and escort armament this one covers the multitude of weapons carried by Coastal Forces many of which were improvised ad hoc or obsolescent but eventually led to powerful purpose designed weaponry An appendix covering the main deck guns carried by British submarines of this era is included along with an introductory essay by naval ordnance authority Norman Friedman and a selection of photos
