The Explorer's Roadmap to National-Socialism Sarah K. Danielsson, 2016-03-16 Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians Whilst this influence was to become most visible within Hitler's Germany the debates were not by any means restricted to or even originated in Germany Germany was the home of some of the most prominent geographers but this scientific community had a tradition of international debate and exchange with especially British French and Russian geographic societies and institutions Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting raising important questions about the international character and impact of National Socialism Tracing the intellectual history of the international geographic community and its relationship to National Socialism this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work In so doing the book uncovers a long ignored or overlooked important connection between exploration geographers and genocide

Alexander the Great and the Mystery of the Elephant Medallions Frank L. Holt, 2003-11-24 To all those who witnessed his extraordinary conquests from Albania to India Alexander the Great appeared invincible How Alexander himself promoted this appearance how he abetted the belief that he enjoyed divine favor and commanded even the forces of nature against his enemies is the subject of Frank L. Holt's absorbing book Solid evidence for the supernaturalized Alexander lies in a rare series of medallions that depict the triumphant young king at war against the elephants archers and chariots of Rajah Porus of India at the Battle of the Hydaspes River Recovered from Afghanistan and Iraq in sensational and sometimes perilous circumstances these ancient artifacts have long animated the modern historical debate about Alexander Holt's book

the first devoted to the mystery of these ancient medallions takes us into the history of their discovery and interpretation into the knowable facts of their manufacture and meaning and ultimately into the king's own psyche and his frightening theology of war. The result is a valuable analysis of Alexander's history and myth, a vivid account of numismatics and a spellbinding look into the age-old mechanics of megalomania.

Britain and Tibet 1765-1947 Julie G. Marshall, 2005 This bibliography is a record of British relations with Tibet in the period 1765 to 1947. As such it also involves British relations with Russia and China and with the Himalayan states of Ladakh, Lahul and Spiti, Kumaon and Garhwal, Nepal, Sikkim, Bhutan and Assam in so far as British policy towards these states was affected by her desire to establish relations with Tibet. It also covers a subject of some importance in contemporary diplomacy. It was the legacy of unresolved problems concerning Tibet and its borders bequeathed to India by Britain in 1947 which led to border disputes and ultimately to war between India and China in 1962. These borders are still in dispute today. It also provides background information to Tibet's claims to independence, an issue of current importance. The work is divided into a number of sections and subsections based on chronology, geography and events. The introductions to each of the sections provide a condensed and informative history of the period and place the books and article in their historical context. Most entries are also annotated. This work is therefore both a history and a bibliography of the subject and provides a rapid entry into a complex area for scholars in the fields of international relations and military history as well as Asian history.

The History of the Central Asian Republics Peter L. Roudik, 2007-10-30 Central Asia's long and complicated history is teeming with diverse cultures and traditions. The nations of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan have served as a major cultural crossroad throughout the millennia with many customs colliding and blending along the way. In this comprehensive volume students can learn how Central Asia developed in ancient times and how the nations of the steppes evolved through the Middle Ages into modern history. From the Silk Road to Russian colonization to Soviet rule, Central Asia's ever-changing nations continue to play an important role in international society today. This volume is the perfect addition to any high school, public or undergraduate library.

Henry Fairfield Osborn Brian Regal, 2018-08-06 The discovery in the 1920s of a huge cache of fossils in the Gobi Desert fuelled a mania for dinosaurs that continues to the present. But the original goal of the expedition was to search for the origins of man. Henry Fairfield Osborn, 1857-1935, director of the American Museum of Natural History, stood at the forefront of the debate over human evolution and the expedition aimed to prove his theory of human origins. Osborn rejected the idea of primate ancestry and constructed a non-Darwinian theory that the evolution of man was the long, adventurous story of individuals and groups exerting personal will, power and inborn characteristics to achieve both biological and spiritual success. It is an idea that still echoes today. Study of Osborn's thinking, however, has been obscured by the perception that racism influenced his theories. Brian Regal paints a different and more textured picture in this book; he shows that Osborn's views on race, like his political ideas, were motivated by his science itself, grounded in religious doctrine. His belief in the Central Asian origins of

man his role as an activist for eugenic reform and immigration controls his support for Nordicism his place in the New versus Old biology debate his role in the Christian Fundamentalist controversy the Scopes Monkey trial and finally his construction of the Dawn Man hypothesis all stemmed from his desire to support his human evolution theory and point the way to salvation This biography charts Osborn s intellectual development from its roots in the eclectic Christianity of his mother through his student days with Arnold Guyot James McCosh and T H Huxley to his mature work at the American Museum It examines his trials and tribulations friendships and conflicts and the world in which he lived all contributed to the construction of his theory It is the dramatic story of a man holding onto ideas that for him represented the very meaning of life itself

Chasing the Sea Tom Bissell,2003 In 1960 the Aral Sea was the size of Lake Michigan a huge body of water in the deserts of Central Asia By 1996 when Tom Bissell arrived in Uzbekistan as a naive Peace Corps volunteer disastrous Soviet irrigation policies had shrunk the sea to a third its size Bissell lasted only a few months before complications forced him to return home but he had already become obsessed with this beautiful brutal land Five years later Bissell convinces a magazine to send him to Central Asia to investigate the Aral Sea s destruction There he joins forces with a high spirited young Uzbek named Rustam and together they make their often wild way through the ancient cities Tashkent Samarkand Bukhara of this fascinating but often misunderstood part of the world Slipping more than once through the clutches of the Uzbek police who suspect them of crimes ranging from Christian evangelism to heroin smuggling the two young men develop an unlikely friendship as they journey to the shores of the devastated sea Along the way Bissell provides a history of the Uzbeks recounting their region s long violent subjugation by despots such as Jenghiz Khan and Joseph Stalin He conjures the people of Uzbekistan with depth and empathy and he captures their contemporary struggles to cope with Islamist terrorism the legacy of totalitarianism and the profound environmental and human damage wrought by the sea s disappearance Sometimes hilarious sometimes powerfully sobering Chasing the Sea is a gripping portrait of an unfamiliar land and the debut of a gifted young writer

The History of Afghanistan Meredith L. Runion,2017-04-24 This chronological account traces the history of Afghanistan from pre civilization to present day events and considers the future of democracy in Afghanistan For centuries Afghanistan has endured control by a gamut of political regimes as a result of its strategic location along the trade route between Asia and the Middle East The area has been at the center of constant conflict and only in recent years has recovered from the vestiges of warfare The second edition of this popular reference offers a fresh glimpse at the country showing modern Afghanistan to be a melting pot of cultures tribes and political influences all under the guiding belief of Islam In addition to thorough coverage of the country s political economic and cultural history the book provides students with an account of recent events in Afghanistan since 2007 such as the death of Osama bin Laden in Pakistan and the removal of NATO soldiers Other changes include a revised timeline an updated glossary additions to the notable figures appendix and an expanded
