**Evaluation of Alternative Lighting Systems for Guide Sign Illumination** Jonathan Everett Upchurch,1986 The study objective was to identify a lighting system which

has a lower power cost and reduced maintenance requirements and which provides adequately for motorists needs in terms of legibility and illumination level Twenty five candidate lighting systems were identified through a review of technical data and specifications for lamps and fixtures by an independent lighting expert Photometric tests and computer analyses of sign illumination levels reduced the number of candidates to ten alternative systems which were then field tested Each alternative lighting system was tested for 10 to 14 months Sign luminance was measured with a telephotometer Power consumption was monitored Maintenance requirements and lamp life were noted A human factors study determined legibility distance and rated viewing comfort lighting uniformity and color rendition An economic analysis was performed which considered the initial cost of acquiring and installing the lighting systems and annual costs for electric power washing relamping and ballast replacement A lighting system using the high pressure sodium light source was recommended Compared to the existing commonly used fluorescent system it uses one third as much electric power and has about one third of the annual owning and operating cost The recommended system has a satisfactory illumination level and provides the best legibility distance of the ten systems tested

*Green Clean Alternatives* Kaia Stonebrook, AI, 2025-02-27 Green Clean Alternatives tackles the critical question of whether today's cleaning products truly live up to their green claims It argues that the term biodegradable is often misleading and investigates the actual environmental impact of these detergents One surprising insight is that many so called biodegradable detergents don't fully break down in real world conditions or they degrade into harmful substances still posing a threat to aquatic ecosystems The book advocates for greater transparency and a shift towards genuinely sustainable cleaning alternatives The book meticulously examines the chemical compositions of detergents and the methodologies used to assess their environmental effects highlighting limitations and biases in existing data It uses lifecycle assessments LCAs to compare the environmental footprints of different products from production to disposal Progressing chapter by chapter the book moves from defining biodegradability to analyzing environmental datasets and finally offering practical recommendations for consumers businesses and policymakers empowering readers to make informed choices and promote sustainable cleaning practices

**Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1.** John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T.

Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of

how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike
