the authors offer a comprehensive and convincing account of the value of case study in educational research. What comes across quite passionately is the way in which a case study approach can bring to life some of the complexities, challenges and contradictions inherent in educational settings. The book is written in a clear and lively manner and should be an invaluable resource for those teachers and students who are incorporating a case study dimension into their research work. Ian Menter, Professor of Teacher Education, University of Oxford. This book is comprehensive in its coverage yet detailed in its exposition of case study research. It is a highly interactive text with a critical edge and is a useful tool for teaching. It is of particular relevance to practitioner researchers providing accessible guidance for reflective practice. It covers key matters such as purposes, ethics, data analysis, technology, dissemination and communities for research. And it is a good read. Professor Anne Campbell, formerly of Leeds Metropolitan University. This excellent book is a principled and theoretically informed guide to case study research design and methods for the collection, analysis and presentation of evidence. Professor Andrew Pollard, Institute of Education, University of London. Research Methods in Education series. Each book in this series maps the territory of a key research approach or topic in order to help readers progress from beginner to advanced researcher. Each book aims to provide a definitive, market-leading overview and to present a blend of theory and practice with a critical edge. All titles in the series are written for Master's level students anywhere and are intended to be useful to the many diverse constituencies interested in research on education and related areas. Other books in the series: Qualitative Research in Education (Atkins and Wallace), Action Research in Education (McAteer), Ethnography in Education (Mills and Morton).

Case Study Methodology in Higher Education Baron, Annette, McNeal, Kelly, 2019-06-28. In higher education case studies can be utilized to have students put themselves into problems faced by a protagonist and by doing so address academic or career-related issues. Working through these issues provides students with an opportunity to gain applied perspective and experiences. Professors in higher education who choose this method of teaching require navigational tools to ensure that students achieve stated learning objectives. *Case Study Methodology in Higher Education* is an essential research publication that focuses on the history and theories relating to case study methodology, including techniques for writing case studies and utilizing them in university settings to prepare students for real-life career-related scenarios. This publication features a wide range of topics such as educational leadership, case writing and teacher education. It is essential for educators, career professionals, higher education faculty, researchers and students.
