Airwar Volume 1 Terror From The Sky:

Of Arms and Men Robert L. O'Connell, 1990-04-19 O'Connell's vividly written history of weapons in Western culture from prehistoric times to the nuclear age demonstrates how social and economic conditions determine the types of weapons and the tactics used in warfare and how in turn innovations in weapons technology often undercut social values. He integrates the evolution of politics, weapons, strategy and tactics into a coherent narrative, one spiced with striking portraits of men in combat and brilliant insight into why men go to war.

The Allied Air War and Urban Memory Jörg Arnold, 2011-08-22 The cultural legacy of the air war on Germany is explored in this comparative study of two bombed cities from different sides of the subsequently divided nation. Contrary to what is often assumed, Allied bombing left a lasting imprint on German society, spawning vibrant memory cultures that can be traced from the 1940s to the present. While the death of half a million civilians and the destruction of much of Germany's urban landscape provided usable rallying points in the great political confrontations of the day, the cataclysms were above all remembered on a local level in the very spaces that had been hit by the bombs and transformed beyond recognition. The author investigates how lived experience in the shadow of Nazism and war was translated into cultural memory by local communities in Kassel and Magdeburg, struggling to find ways of coming to terms with catastrophic events unprecedented in living memory.

An Air War with Cuba Daniel C. Walsh, 2011-11-16 Since 1985 Radio Marti, a Radio Free Europe type station, has broadcast American news and propaganda in Cuba. Its sister station TV Marti debuted in 1990. Respected operations at the start, Radio and TV Marti fell under the influence of the Cuban American National Foundation, a group of hard-line Cuban exiles who intensified the anti-Castro rhetoric, the stations sent to the island and promoted its leaders as the heirs to a post-Castro Cuba. Though the initial goal of the two stations was to increase pro-American sentiment among the island nation's citizens, the stations have succeeded only in driving the two nations further apart. This history of American propaganda broadcasting in Cuba describes how Castro used radio to obtain power, explores the impact of Radio and TV Marti on U.S.-Cuba relations, including the phenomenon of Cuban rafters, and chronicles the domestic political struggles to keep the stations on the air.

Military Intelligence, 1991

Military Power Stephen Biddle, 2010-12-16 In war, do mass and materiel matter most? Will states with the largest, best-equipped information technology-rich militaries invariably win? The prevailing answer today among both scholars and policymakers is yes. But this is to overlook force employment or the doctrine and tactics by which materiel is actually used. In a landmark reconception of battle and war, this book provides a systematic account of how force employment interacts with materiel to produce real combat outcomes. Stephen Biddle argues that force employment is central to modern war, becoming increasingly important since 1900 as the key to surviving ever more lethal weaponry. Technological change produces opposite effects depending on how forces are employed to focus only

on materiel is thus to risk major error with serious consequences for both policy and scholarship In clear fluent prose Biddle provides a systematic account of force employment s role and shows how this account holds up under rigorous multimethod testing The results challenge a wide variety of standard views from current expectations for a revolution in military affairs to mainstream scholarship in international relations and orthodox interpretations of modern military history Military Power will have a resounding impact on both scholarship in the field and on policy debates over the future of warfare the size of the military and the makeup of the defense budget

Tom Cooper,Efim Sandler,2024-01-20 In June 1967 Israel which seemed on the verge of being annihilated by its Arab neighbors took six days to redraw the Middle Eastern strategic map in one of the most dramatic reversals of fortune in modern times The success was over a decade in the making following the Suez Crisis with the Israeli forces being radically changed to create an army and air force upon which the country would rely when it became obvious the international community would take no action to implement guarantees made after the events of 1956 The Israeli forces were honed in low level clashes during the 1960s notably the Water Wars which the Israelis did so much to provoke By contrast the Arab forces became complacent largely due to supplies of arms from the Warsaw Pact states With proper training this complacency could have been turned into military effectiveness but the Arab forces were plagued by internal rivalries and high commands too often depending upon politically reliable officers rather than those who were militarily effective The Egyptian forces were further undermined by their commitment to the debilitating Yemen Civil War which meant they were in no condition to confront Israel Syria and Jordan whose forces could not fight the Israelis alone complained loudly about President Nasser s lack of action against Israel Nasser s decision in early 1967 to regain the prestige he had lost since the heady days of the Suez Crisis with a demonstration in the Sinai Peninsula was interpreted by the Israelis as preparations for an invasion Nasser did nothing to persuade them otherwise and when it was clear the international community would do nothing the Israelis decided to strike Egypt and in turn Syria and Jordan The Israeli campaign was heralded by a massive surprise air attack first on the Egyptians and then on the other neighboring states and ground offensives then followed in succession Volume 1 of The June 1967 Arab Israeli Six Day War provides an in depth background to the long running confrontation between Arab and Jew in the Middle East a detailed overview of the rival air forces that would become embroiled in the conflict and an account of the opening Israeli air strikes against Egyptian targets This volume is illustrated throughout with original photographs and includes specially commissioned full color aircraft profiles *The Conduct of the Air War in the Second World War* Horst Boog,1992 Leading experts examine the air war in the context of modern industrialised societies and compare the different ways in which it was conducted by the main air powers They demonstrate that the relationship between civilians and the military had as much impact on the conduct of the air war as the leadership The authors cover a wide spectrum and focus on topics such as air war and foreign and domestic policies top echelon command and leadership strategic planning air armament and war economy operations and logistics intelligence and reconnaissance and air war humanity and international law *AB Bookman's Weekly* ,1992
