Solubility Data Series R.W. Cargill, 2013-10-22 This volume in the Solubility Data Series contains tabulated collections and critical evaluations of original data for the solubility of carbon monoxide in a variety of liquid solvents The solvents include water aqueous and non aqueous salt solutions a variety of hydrocarbons a variety of oxygen containing halogen containing sulfur containing and nitrogen containing organic compounds and also some biological fluids with which carbon monoxide has an important interaction The data were gathered from a search of the world's chemical literature through to the end of 1988 and make up a unique and valuable historical survey of the solubility of carbon monoxide Their publication is timely in view of current concern about carbon monoxide as an atmospheric pollutant and in view of the role which carbon monoxide is likely to play in the future as chemical feedstocks may have to change in response to supply and demand patterns and as alternative energy sources are developed especially coal gasification technology For all of these applications and for numerous others this volume of well documented and critically evaluated gas solubility data will be of tremendous benefit **Handbook of Environmental Fate and Exposure Data for Organic Chemicals, Volume IV** Philip H.
