Creating Wholeness Through Art:

Creating Wholeness Through Art Evelynna Gateva,1991 *Techniques and Principles in Language Teaching* Diane Larsen-Freeman,2000 This book provides a practical overview of the most important methods in the field Readers are drawn into classrooms where various teaching methods and approaches are being used They are encouraged to reflect on their own beliefs and to develop their own approach to language teaching Publisher **Choice Centered Astrology** Gail Fairfield,1998-06-01 A practical approach that provides basics for understanding astrological charts Shows you how to utilize astrology to make the most of your life and gives clear examples of in depth choice centered interpretations of aspects houses planets and signs Whether you are a novice knowledgeable student or professional in the field you will find this book useful

Healing with Art and Soul Kathy Luethje,2008-12-18 This fascinating collection of essays contains a variety of perspectives about the use of expressive arts for facilitating physical and emotional healing Each author within brings a fresh approach and unique experiences to their writing Within these pages you will find many ideas for the use of the arts and can learn how to engage the inner layers of the self that allow natural healing processes of the body and soul to flourish When we fully engage an art modality we find ourselves in a place in our consciousness that could be called healingspace where we feel ourselves whole and re member ourselves as well From psychic trauma to physical illness dis ease of many kinds may be addressed through the various techniques discussed here The tools offered by some authors are population specific and age appropriate while several authors have given us the philosophical underpinnings for it all While the authors within represent the grassroots voices of this new and rapidly expanding field several of them have developed their own methods for using the arts and have thriving practices Our approach is wholistic Music visual arts movement dance and poetry are discussed as separate modalities and in combination with one another in a process or flow The reader will engage in our experiences with these modalities as they have been lived The complementary CD that accompanies this book will allows the listener to have a full sound experience of toning If a rationale is needed for establishing arts programs in medical centers or other health facilities it can be found here The book offers tools for self development and for group facilitation Those wanting to expand their healing practice through the use of the arts will find the book to be a faithful guide Anyone wishing for a fuller understanding of how the arts may work to facilitate healing will find much food for thought within these pages

Feminisms and Womanisms Althea Prince,Susan Silva-Wayne,2004 *Feminisms and Womanisms* brings together theory and practical application so that feminist discourse interacts as a partner with the lived experience of women s social action The selections combine classics in feminist thought with work from modern theorists and offer a solid foundation in international feminism The conceptual understanding embedded in the terms feminism and womanism contributes to feminist discourse a carefully differentiated focus on the ideological uses of language to define relationships that have been historically mired in domination The terms also define the way gender often has been used to signify and support domination

Given that feminism and womanism are interpretive concepts there is always a sense that knowledge making is in progress for there is nothing static or stagnant about feminism feminist theory and feminist action The formative nature of the feminist movement has of necessity a parallel interpretive theory This reader embraces both the formative nature of the movement and the accompanying interpretive theories It also pays attention to the chronological cultural geopolitical racial and ethnic landscapes and sites where women live carry out social action and theorize issues of equality For both the general and academic reader this book will be edifying while providing exposure to the feminist womanist voices that inform the scholarship

Encountering Choran Community Emily Hinnov, 2009-07 Through a transnational perspective Emily M Hinnov s Encountering Choran Community Literary Modernism Visual Culture and Political Aesthetics in the Interwar Years identifies and describes modernist choran community as a previously understudied key counter narrative to Modernism s engagement with early twentieth century master narratives Hinnov uses the term choran community in order to emphasize the almost sacred nature of the experience represented in common by select modernist texts photographs and photo texts produced in the interwar period As Hinnov describes choran community comes about as a result of the choran moment or textual instant when characters and or readers recognize their connection with a larger inherently unified whole Whether in a visual verbal or hybrid text the stasis of the choran moment contains the potent possibility of communal awareness or choran community in the future as well as the present The textual choran communities presented here consequently offset the sexist racist and classist solipsism of imperialist or fascist master narrative Emily N Hinnov is Assistant Professor of English at Bowling Green State University Firelands College

Neuropedia | The Deblocking Method Paulo Sergio Santos Negrete, aka, "Teacher John Chapman", 2021-03-09 Welcome to Neuropedia The Deblocking Method This method accelerates learning 3 to 5 times more than any conventional method It has several positive by products such as psychotherapeutic and psycho hygienic effects in the Suggestopedic environment created in the classroom During my years of teaching English as a Foreign Language I could never accept the fact that my students needed so many years to start speaking a new language with confidence Some others even with years of study and dedication could not develop despite my efforts to create better classes and activities Others had to constantly review the verb to be The results The students were afraid of speaking and learning Many people may ask But how can it be possible to learn effectively in a short time What s the secret Others say That s impossible It is just propaganda But actually we are beings with an incredible power to learn but the Social Suggestive Norms so present in our pedagogical system for centuries dictate how much we can learn and how long we need to But I ask you How did we learn our mother language How could our brain collect organize understand and reproduce words and sentences when we were children No one went to school to learn to speak Our parents or who may have raised us never taught us grammar in order to make us speak We can realize that we are missing something in our system of foreign language teaching It does not use the resources available in our brain mind Our way of teaching in the present is not structured to follow the way the brain receives stores and processes information So why not change the whole system The answer is quite simple Who wants to train teachers Change textbooks and methods How long would it take But the fact is that more scientists are discovering the mysteries of mind and memory We are taking advantage of these discoveries made centuries and decades ago Researchers have noticed that the current pedagogic system is not the best approach to learn That s why so many so called accelerated learning systems or brain friendly approaches have appeared The main problem is that most of them have never been really tested They have not had a follow up for decades to check if they would be beneficial to the students Neuropedia is a method with a scientific background

Thinking Through Art Katy Macleod, 2013-01-11 Focusing on a unique arena Thinking Through Art takes an innovative look at artists experiences of undertaking doctorates and asks If

the making of art is not simply the formulation of an object but is also the formation of complex ideas then what effect does academic enquiry have on art practice Using twenty eight pictures never before seen outside the artists universities Thinking Through Art focuses on art produced in higher educational environments and considers how the material product comes about through a process of conceiving and giving form to abstract thought It further examines how this form which is research art sits uneasily within academic circles and yet is uniquely situated outside the gallery system The journal articles from eminent scholars artists philosophers art historians and cultural theorists demonstrate the complexity of interpreting art as research and provide students and scholars with an invaluable resource for their art and cultural studies courses

Disabled Witchcraft Kandi Zeller,2024-09-17 Magick is all around us and should be for everyone But the practices in many witchcraft books can be difficult for many of us to perform due to chronic illnesses sensory issues allergies or other disabilities and the financial limitations that often go hand in hand with them In this guide disabled witch Kandi Zeller sets out to change that Through 90 inclusive and sometimes spicy magickal rituals designed for witches with disabilities of all kinds especially the invisible ones Disabled Witchcraft lays out a truly accessible magickal practice with a solid dose of humor and heart If your spoons aka available energy and executive function are limited on any given day that doesn't need to be a hindrance to following your spiritual path From guidance on using crystals for nervous system regulation to tarot readings for spoonies to laying a curse upon unjust health systems you'll find practical tools to harness the magick of your disabilities fight both ableism and capitalism and embrace a more expansive version of the path **Critical**

Neurophilosophy & Indigenous Wisdom Four Arrows,Gerg Cajete,Jongmin Lee,2010-01-01 This book begins a long overdue dialogue between Western neuropsychology and Indigenous wisdom The latter holds that technology including that which supports the neurosciences is an important aspect of humanity but that without a deeper understanding of the sacred natural world its consequences will continue to disrupt the balance of life on Earth This book argues that without incorporating Indigenous wisdom into theories relating to brain research and scientific assumptions about human nature humanity may never learn how to avoid this problem After summarizing current studies about such important topics as generosity truthfulness courage humour art spirituality and lateralization two indigenous scholars and a South Korean neuroscientist discuss the research conclusions In most cases the ancient knowledge of Indigenous Peoples reveals significantly contrasting perspectives By offering students of neuropsychology and the various schools of neurophilosophy radically different views than those seen through the lens of Western science this book will help assure that understandings about the human brain may lead to a more healthy balance in human affairs Questions at the end of each chapter give opportunities for the reader to continue the dialogue and find further studies to support or refute the Indigenous assertions
