Crafts Contemporary Design And Technique:

The Art and Craft of Modern Textile Design Sadhna, Rajesh Kumar, S Greeshma, 2025-05-26 This contributed volume explores the craft and science of modern textile design. It offers a carefully curated collection of essays, insights, and case studies. The chapters presented here exist where craftsmanship converges with cutting edge technology and traditional techniques dance with avant garde experimentation and illustrate how fabric can unlock limitless possibilities of artistic expression. From the historical roots that anchor contemporary practices to the forefront of technological advancements shaping the industry, this book offers a panoramic view of the field. The chapters celebrate the artistry behind the loom and the visionary designers who push the boundaries of conventional thinking, transforming threads into transcendent works of art. As the title suggests, this volume is not just about technique; it explores the imaginative spirit that breathes life into fibers. The book invites readers to witness the synergy between tradition and innovation, uncover the narrative threads woven into every fabric, and appreciate the extraordinary craftsmanship that elevates textiles beyond mere utility. This edited volume is designed to appeal to a diverse audience, from students and scholars to industry professionals and anyone with an appreciation for the intersection of art and function. The book aims to provide readers with a thorough understanding of the various facets of contemporary textile design, from historical influences to emerging trends.

Proceedings of the 3rd International Conference of Art, Craft, Culture and Design (ICON-ARCCADE 2023) Tyar Ratuannisa, Meirina Triharini, Kiki Rizky Soetisna Putri, Ardhana Riswarie, Bintan Titisari, 2024-04-27 This is an open access book. Globally, 2023 marks the mid point of the 2030 UN Sustainable Development Goals agenda, yet we are still struggling to rebuild and respond to current conditions in every aspect. The future remains unpredictable, and never have we been presented with such complexity as what we are facing today. As we continue to live in this age of Anthropocene, we carry on the legacy of being the cause of both destruction and rehabilitation. These ambiguous roles manifest on every occasion when we try to solve a problem. Consequently, we grow to feel more anxious, and innovation seems to no longer be possible. Creativity is at the heart of what we do as artists, makers, and designers. For us, crisis creates opportunities to open up other pathways in this ever-changing world. With its fluidity, art, craft, culture, and design discipline has significant roles in facilitating changes everywhere through its capability to connect humans, nature, and everything in between. At this conference, we are inviting you to explore the theme of Fluid Ubiquitous, which is elaborated into various sub themes that encompass some key ideas: Care, Systemic Design, Cross cultural Identity, Object as an Agency, Transmateriality.

A Theory of Craft Howard Risatti, 2009-12 What is craft How is it different from fine art or design In A Theory of Craft Howard Risatti examines these issues by comparing handmade ceramics glass metalwork weaving and furniture to painting sculpture photography and machine made design from Bauhaus to the Memphis Group He describes craft s unique qualities as functionality combined with an ability to express human values that transcend temporal spatial and social boundaries Modern design today has taken over from craft the making of functional objects of daily use by employing machines to do work once done by hand Understanding the aesthetic and social implications of this transformation forces us to see craft as well as design and fine art in a new perspective Risatti argues Without a way of understanding and valuing craft on its own terms the field languishes aesthetically being judged by fine art criteria that automatically deny art status to craft objects Craft must articulate a role for itself in contemporary society says Risatti otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost A Theory of Craft is a signal contribution to establishing a craft theory that recognizes defines and celebrates the unique blend of function and human aesthetic values embodied in the craft object
