Creating A Transatlantic Marketplace Government Policies And Business Strategies:

Creating a Transatlantic Marketplace Michelle P. Egan, 2005-07-22 Looking at the current state of the EU US trade relationship this text studies attempts at economic integration and cooperation arguing that it can provide information about the evolution of new policies and practices to manage the transatlantic economy

Transatlantic Regulation Susanne Lütz, 2016-03-16 The European and American economies are closely interlinked as mutually important investment and trading partners The growing intensity of economic interdependence has spurred the transatlantic coordination of rules and standards that can lead to the formation of non tariff barriers to transatlantic commerce But despite impressive government to government efforts to eliminate market barriers the E U and the U S have frequently clashed over each other s regulatory policies The aim of this book is to explore the domestic sources of cooperation or conflict in transatlantic regulation The book analyses the role of domestic factors through three theoretical lenses that are well established in the study of multilevel systems the principal agent approach the two level game metaphor and through a wider concept of institutionalism which emphasises the links between societal interests and regulatory ideas with institutional frameworks The book states that domestic factors embody more obstacles than opportunities for horizontal coordination It is argued that transatlantic relations will likely undergo a double movement of being simultaneously shifted upwards to become part of the global governance architecture and downwards towards broader involvement of legislators in regulatory matters Hence transatlantic regulation might in the near future be shaped more by political leaders rent seeking interest groups and legislators than by networks of technocrats This book was published as a special issue of the Review of International Political Economy

Cooperating on Competition in Transatlantic Economic Relations C. Damro, 2006-10-10 In this in depth study Damro explains the creation of a formal cooperative framework for preventing disputes in transatlantic competition policy The findings suggest that while regulators remain constrained by domestic institutions they play an important role in explaining why the cooperative framework is largely a discretionary one

Managing EU-US Relations Rebecca Steffenson, 2005-10-07 This book examines developments in E U U S political and economic relations in the 1990s It contributes to the existing literature by combining knowledge about actors and institutions to outline the transatlantic decision making process It focuses not only on how states co operate but how they effectively govern the transatlantic marketplace and the international political order through transatlantic institutions Studying transatlantic governance enables us to understand not only how domestic or E U level decision making structures affect transatlantic decisions but also how transatlantic decisions affect domestic institutions In short employing decision making structures as an analytical approach helps us identify who governs and how and who or what determines policy outcomes This book is the result of a comprehensive research project and it includes detailed case studies on E U U S efforts to fight people trafficking E U U S regulatory co operation in the form of Mutual Recognition Agreements and the transatlantic trade dispute over bananas The

book is aimed at anyone with an interest in what transatlantic relations entail outside the confines of NATO security **The New and Changing Transatlanticism** Laurie Buonanno, Natalia Cuglesan, Keith Henderson, 2015-03-24 The European Union and the US are currently negotiating the Transatlantic Trade and Investment Partnership TTIP with potentially enormous economic gains for both partners Experts from the European Union and the US explore not only the groundwork laid for TTIP under the New Transatlanticism but also the key variables economic cultural institutional and political shaping transatlantic policy outcomes Divided into four parts Part I consisting of three chapters contextualizes the transatlantic relationship with an historical survey contemporary foreign relations and policy and cultural dynamics Together these chapters provide the background for understanding the evolving nature of the EU US relationship Part II of this volume focuses on governance and comprises two chapters one on transatlantic governance and the other administrative culture Part III consists of six policy chapters competition trade transport mobility regimes financial services regulation and GMOs Part IV consisting of three chapters explores prospects and challenges associated with transatlanticism including the TTIP The last chapter concludes with lessons learned and future challenges with respect to policy convergence the nature of the EU US relationship power resources and bargaining within the transatlantic partnership and an assessment of the future of deeper cooperation and integration This insightful account into policy cooperation between the EU and the US is a welcomed resource for policy specialists oriented toward comparative public policy wishing to enter the arena of Transatlantic Studies

Fahey, Deirdre Curtin, 2014-07-17 This volume explores law s place in contemporary transatlantic relations and considers its institutional characteristics and trade and security rule making Product Market Integration Helena Maria Guimaraes, Ana Faria, 2010-08-18 Addresses the issue of product market integration within the European Union EU from a multidisciplinary approach that ranges from economics to political science and sociology This book assesses the functioning of the EU Internal Market and evaluates the need for differentiated integration in an enlarged and heterogeneous EU Tourism Diplomacy Mahmut Demir, Şirvan Şen Demir, 2025-08-13 This edited volume explores emerging trends and challenges in tourism

diplomacy including the growing influence of digital technologies and social media in shaping diplomatic efforts *The Ashgate Research Companion to Regionalisms* J. Andrew Grant, 2016-03-23 EU studies increasingly recognize the salience of new regional insights Hence this collection of original essays provides a broad overview of regionalism together with detailed analyses on the construction activities and implications of both established and emerging examples of formal political and economic organizations as well as informal regional entities and networks Aimed at scholars and students interested in the continuing growth of regionalism The Ashgate Research Companion to Regionalisms is a key resource to understanding the major debates in the field Organized into three main sections this volume deals with a wide range of issues covering the following important research areas Section one covers theoretical and methodological approaches to the study of established and formal regionalism emerging and informal regionalism inter regionalism and levels of regionalism Section two provides detailed case studies of established and formal regionalisms EU NAFTA ASEAN SAARC OAS MERCOSUR AU ECOWAS and SADC Section three offers case studies that investigate emerging and informal regionalisms in Oceania the Arab League BRICSAM and the Commonwealth s as well as thought provoking chapters on micro regional processes evident in spatial development initiatives transnational gangs transfrontier conservation areas and the migration conflict nexus in natural resource sectors With the study of regionalism becoming an increasingly important part of politics international relations development and global studies courses this comprehensive volume is a valuable addition for classroom use *Airline Choices for the Future* Kostas Iatrou, Mauro Oretti, 2016-03-16 Airline Choices for the Future From Alliances to Mergers offers an up to date assessment of the industry as it stands today delivering a comprehensive insight into how the world of airline alliances is changing and how the merger phenomenon is likely to fit into the new scenario The purpose of this book is twofold Firstly it outlines the evolution and the reasons behind alliances between international air carriers the alliances track records and the way they have affected airlines and the air transport industry Secondly drawing on past and more recent developments in the industry it examines the experiences airlines involved in cross border mergers have gone through and the advantages and difficulties they have come across Alliances and mergers are presented from both the airline and the consumer perspective The book provides a balanced account of where mergers and alliances have taken the industry to date bridging the gap between merger theory and implemented practices and strategies It also identifies the challenges alliances and cross border mergers have faced and highlights the key forces affecting airline development Theoretical evidence is supplemented by data collected via surveys and interviews with airline executives aviation experts consultants and regulatory bodies *Data Governance* Anke Sophia Obendiek, 2023 As digital data becomes increasingly important for security agencies business and individuals the ability to control it becomes ever more attractive with conflict arising as multiple parties attempt to do so This book looks at the arguments at the heart of these conflicts and creates a framework to analyse and assess how these get resolved *EU Economic Governance and Globalization* Miriam Campanella, Sylvester C.

W. Eijffinger, 2003 It is through a gradual evolution rather than by grand design that the somewhat fragmented economic policies of the EU now appear to be heading towards a rather more robust and coherent economic governance EU Economic Governance and Globalization considers the following crucial question as the EU enters its final stage of institution building will the economic institutions of the EU push ahead to reform its rigid national economies and open them up to globalization and international competition Focusing on telecommunications air transportation currency competition taxation eastern enlargement and transatlantic relations the contributors to this book question whether EU standards regulatory regimes and policies are flexible enough to bring about a dynamic and open economy This book will be of interest to scholars of European and regional studies and international political economy as well as policy analysts and policymakers **EU Regulatory**

Decision Making and the Role of the United States Oliver Ziegler, 2012-09-05 Oliver Ziegler raises the question of what role economic interests of the United States play in the regulatory decision making process of the European Union Critics often assume that U S dominance in the world economy fueled by a powerful business elite has significantly affected EU regulations at the expense of environmental and consumer protection standards The author falsifies this proposition He shows first that the EU often adopts regulations against the explicit opposition of the U S thereby ignoring the principles of transatlantic regulatory cooperation Second he demonstrates that business interests in the EU are usually not homogenous and often come second to environmental and consumer concerns In addition the author shows the increasing role of the European Parliament in EU regulatory decision making **Single Markets** Michelle P. Egan, 2015 This ambitious volume provides a trenchant and timely analysis of the creation of a single market in both the EU and the US Comparing the experience of the US during the nineteenth century and the single market of the EU in the twentieth century Single Markets demonstrates how the political economy of single market formation has followed remarkably similar trajectories Both cases show evidence of interplay between different levels of government in determining distributive outcomes evolution of a legal framework for the market and development of new regulatory strategies to deal with changing economic realities The book illustrates the process of market consolidation through a detailed comparison of the so called four freedoms the removal of border controls and the largely unrestricted transfer of goods services and capital across different jurisdictions In both cases establishing one market one currency and a more unified banking and financial system transformed largely autonomous or sovereign constituent units into a more unified economic entity Single Markets also sheds light on critically important questions for both comparativists and international relations scholars regarding the nature of territorial governance and the construction of state interests The book's interdisciplinary approach to focusing on crucial political and economic developments on both sides of the Atlantic will be of interest to scholars in political science public policy law and history

Aviation and Tourism Anne Graham, Andreas Papatheodorou, Peter Forsyth, 2016-04-08 Transport is an essential element of tourism providing the vital link between the tourist generating areas and destinations Good accessibility which is

determined by the transport services provided is a fundamental condition for the development of any tourist destination. Moreover, the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated. Aviation is an increasingly important mode of transport for tourism markets. Whilst geography has meant that in modern times air travel has always been the dominant mode for long distance travel and much international tourism moves towards deregulation and in particular the emergence of the low cost carrier sector have also increased aviation's significance for short and medium haul tourism trips. Thus developments in aviation can have very major implications for many leisure and business tourism markets. However, the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained. In spite of the obvious closeness between the aviation and tourism industries there are very few specialist texts on this subject. Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed whereas aviation specialist texts rarely concentrate on just leisure travel. In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies. Therefore it is the aim of this book to fill this important gap which exists with a comprehensive in depth study of the relationship between aviation and leisure travel. The book deals exclusively with issues related to the relationship between aviation and leisure travel. It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries. Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined.

The European Union in the 21st Century Nikolaos Zahariadis, 2023-08-24. The European Union in the 21st Century takes a fresh look at a complex and ever changing organization by examining its pursuit of two very different objectives: power, security and political weight and plenty, economic growth and social welfare. Nikolaos Zahariadis aims to help students understand these two objectives and how the tension between them affects different issue areas, illuminating how each objective represents a different perspective on what the EU is and what it does. The book also introduces students to the systematic thinking that political scientists employ to see the connections between policies, institutions and actors. By unpacking the various perspectives, students will gain greater insight into how policymakers think and why EU leaders make the kinds of decisions they do.

Rule-Makers or Rule-Takers? Jacques Pelkmans, Daniel S. Hamilton, 2015-08-24. The Transatlantic Trade and Investment Partnership (TTIP) is an effort by the United States and the European Union to reposition themselves for a world of diffuse economic power and intensified global competition. It is a next generation economic negotiation that breaks the mould of traditional trade agreements. At the heart of the ongoing talks is the question whether and in which areas the two major democratic actors in the global economy can address costly frictions generated by their deep commercial integration by aligning rules and other instruments. The aim is to reduce duplication in

various ways in areas where levels of regulatory protection are equivalent as well as to foster wide ranging regulatory cooperation and set a benchmark for high quality global norms In this volume European and American experts explain the economic context of TTIP and its geopolitical implications and then explore the challenges and consequences of US EU negotiations across numerous sensitive areas ranging from food safety and public procurement to economic and regulatory assessments of technical barriers to trade automotive chemicals energy services investor state dispute settlement mechanisms and regulatory cooperation Their insights cut through the confusion and tremendous public controversies now swirling around TTIP and help decision makers understand how the United States and the European Union can remain rule makers rather than rule takers in a globalising world in which their relative influence is waning

Unwanted Company Jonathan Crystal, 2018-07-05 In the last quarter century the U S economy has been transformed by a large inflow of direct investment from abroad Foreign companies mainly from Europe and Japan have built factories and acquired U S firms at an ever increasing rate Jonathan Crystal finds inconsistencies in how American businesses have responded to this globalization of production U S firms especially multinationals have conflicting interests regarding investment protection Crystal shows Many American firms under siege from overseas competitors have already expended considerable energy in obtaining trade protection but they are competing not only with foreign imports but also with locally established foreign owned firms American businesses may favor stricter regulation of foreign companies that threaten their bottom line but they also consider their own interests as global investors subject to retaliatory protection in other countries Restrictions on foreign investment it seems are not so attractive when they are imposed by other countries Unwanted Company examines the different ways in which important U S industries including semiconductors automobiles steel consumer electronics telecommunications and airlines reacted to this new challenge It focuses on the political responses of U S owned firms to how Washington ought to regulate foreign direct investment and how it ought to treat foreign owned firms in the United States Some industries welcomed or at least didn't oppose foreign investment whereas others sought restrictive and discriminatory policies Crystal demonstrates how the nature of the domestic political environment shapes the translation of economic interests into policy preferences
